EXTRACT FROM MINUTES
OF
REGULAR MONTHLY MEETING OF THE
BOARD OF ADMINISTRATORS
CHARITY HOSPITAL OF LOUISIANA
AT NEW ORLEANS

Tuesday, April 27th, 1943, 8:00 p.m.

Henry Joseph Jumonville—Died April 1st, 1943

On motion of Mr. Weis, seconded by Mr. Saussy, the following resolution was adopted on the death of Mr. Henry J. Jumonville:

WHEREAS, Almighty God in his wisdom has taken to his last reward our good friend and colleague, HENRY J. JUMONVILLE, a member of the Board of Administrators of the Charity Hospital of Louisiana at New Orleans, and

WHEREAS, Through this act of the Divine Creator, his fellow members on the Board of Administrators have been deprived of the benefit of his counsel, and

WHEREAS, the keen interest and intelligent application that he manifested in the concerns and affairs of the Charity Hospital made him an invaluable Member of the Board, whose place it will be difficult to fill, Now, Therefore,

BE IT RESOLVED that the Board of Administrators of the Charity Hospital of Louisiana at New Orleans does hereby express its keen sense of loss and sincere sorrow upon the passing of HENRY J. JUMONVILLE, and that a copy of this resolution adopted in regular meeting, be sent to the bereaved family.

Attest:

Fred. W. Matthews,
Secretary-Treasurer.

/s/ L. G. Riecke,
Vice-President
Board of Administrators
Charity Hospital of Louisiana at
New Orleans

Form of Gift of Bequest

FORM OF GIFT OR BEQUEST

I give to the Board of Administrators of the Charity Hospital of Louisiana at New Orleans the sum of

FIVE HUNDRED DOLLARS

to be added to the Children's Bed Endowment Fund.

Full Name

Date

Address

Resolution unanimously adopted by the Board of Administrators at meeting of June 22nd, 1942:

WHEREAS, The care and comfort of the little afflicted children often times requires some form of amusement, entertainment or special services, not otherwise provided for,

THEREFORE, BE IT RESOLVED, That a fund be established whereby gifts or bequests to this fund to be designated as the *Children's Bed Endowment Fund* be accepted upon the following conditions, to-wit: That the principal be set aside unimpaired in perpetuity, and same be invested in high grade securities, and the income therefrom be dedicated and used exclusively for the care and comfort of the afflicted children receiving treatment in this hospital. Furthermore, a suitable tablet be placed in the Children's Ward, with the name of the donor and date of gift inscribed thereon.

BIENNIAL REPORT OF THE VICE-PRESIDENT

Period July 1st, 1942 to June 30th, 1943

His Excellency, Sam Houston Jones,
Governor of the State of Louisiana and
Ex-Officio President of the
Board of Administrators of Charity
Hospital of Louisiana at New Orleans, Louisiana.

Honorable Sir:

In accordance with custom, I respectfully submit to you a report of the operations of the Charity Hospital of Louisiana at New Orleans covering the period from July 1st, 1942 to June 30th, 1943.

The beginning of this period found the Charity Hospital fighting for its very existence because of the fact that in view of legislative difficulties at Baton Rouge, our Board of Administrators did not know whether or not funds would be made available for the continued operation of the Hospital. In view of this, July 1st, found the clinics of the Institution closed and preparations being made for the progressive dismissal of patients because of lack of funds with which to operate. I am happy to present this report to you of the accomplishments of this Administration during this period because I feel that with the help of the Legislature and Your Excellency, our Board has accomplished much for the benefit of the Institution, and the sick and indigent of our State.

We have done nothing spectacular, nothing of the sensational, but the work we have started or have finished has been constructive and productive of good results.

The following is a brief outline of our activities:

EMPLOYEES

As a result of the survey made by the Finance Committee with the assistance and cooperation of Dr. Daly and the Civil Service Department, we have made salary adjustments and equalizations which is rewarding us with excellent employee moral. When Your Excellency first took office, unskilled laborers of which there were over 500 in the Institution, received a minimum pay of \$35.00 per month. This has been gradually increased until it is now \$55.00 per month. Skilled labor has been increased to salaries comparable with equal positions in private industry. The number of employees in the Hospital for the period of July 1st, 1942 to June 30th, 1943, was reduced to an average of 1783 for this period. This compares with a monthly average of 2562 for the previous period, a reduction in average number of employees on the payroll of 779—over 30%.

BOARD APPOINTMENTS, RESIGNATIONS, ETC.

July 9th, 1942—Dr. E. J. Richard was appointed a member of the Board of Administrators. His appointment expiring August 1st, 1945.

On July 9th, 1942, Mr. Malcolm L. Monroe received orders from the Commandant of the Eighth District to report for active duty on August 18th, and therefore tendered his resignation as a member of the Board of Administrators.

On August 10th, 1942, Mr. Joseph W. Montgomery tendered his resignation in order to accept appointment on the Civil Service Committee of the City of New Orleans.

On September 15th, the following appointments were made by Your Excellency:

Mr. William J. Kross for a term expiring August 1st, 1944.

Mr. Charles P. Fenner for a term expiring August 1st, 1945.

Mr. H. J. Jumonville for a term expiring August 1st, 1946.

Mr. Walker Saussy for a term expiring August 1st, 1946 (reappointment)

On August 10th, 1942, Mr. Douglas Freret was called into the armed

services and on August 15th, Louis G. Riecke was elected Vice-President and Chairman of the Board of Administrators. On March 31st, 1943, Mr. Henry Jumonville, Chairman of the Finance Committee and a valuable and conscientious member of the Board of Administrators died. His untiring effort in the establishment of a new system of budgeting for the Charity Hospital will result in enormous financial benefits to the State of Louisiana and the Charity Hospital for many years to come.

LAND LEASES

Part of the property in Lafourche Parish belonging to the Charity Hospital has been leased to the Texas Company who are now drilling for oil. Another part of this property is leased to the Superior Oil Company of Houston, Texas. This property through the leases is now producing revenue for the Hospital and it is believed that the prospect of a development of oil and other minerals is excellent.

These lands are also leased to various trappers for the trapping of fur bearing

DONATIONS, LEGACIES, ETC.

Mr. S. J. Labrot, Jr., contributed \$2600.00 cash for the purchase of special equipment for the Lung Station. Check for \$100.00 was received from Mr. A. F. Backer as a donation to the Lung Station in memory of Miss Minola Backer.

The will of John Sidney Lanata filed December 21st, 1942, bequeathed to Charity Hospital of New Orleans "the balance of my estate". This is estimated to be approximately \$10,000.00. This will has been contested and is now pending in Court.

UNUSED EQUIPMENT

Considerable unused equipment, some of it having been in the Hospital for 30 or 40 years, was turned over to the Department of Institutions to be put to good use in institutions in other parts of the State where such equipment was badly needed.

CONTAMINATED WOUND PROJECT

In cooperation with the National Research Council, operating through the Surgical Division of the Tulane School of Medicine, research work has been carried on at the Hospital covering the treatment of contaminated wounds, particularly burns. This has been a valuable contribution to the war effort and will undoubtedly result in a saving of many lives on the battlefronts.

FINANCES

As will be noted from financial statements elsewhere in this report, the finances of the Hospital are in good condition. Endowment funds have been invested in sound, strong bonds and other securities and because of wise investment and intelligent handling by the Finance Committee there has been a substantial increase in the funds available to the Institution. Eighteen meetings of the Finance Committee were held in the preparation of a complete employee survey in which each and every employee of the Hospital was classified and adjustments made to conform with Civil Service requirements, supplies and new equipment needed, and capital expenditures were estimated. A detailed analysis was made of the pay and functions of each employee of the hospital.

On February 24th, 1943, Chairman B. V. Baker and his Economy Committee of the House inspected the records of the Charity Hospital. Examination were made of our budget, the manner in which expenditures are made, methods used in conducting various departments, and the Committee conferred with various department heads.

I feel certain that you will find from this report that the Committee found the Hospital to be efficiently operated. I should also like to quote from the Times-Picayune of February 11th, 1943 an article by Richard H. Tate as follows: "New Orleans Charity Hospital shows a reduction (in operating costs) reflecting not only good management but the effect of mass buying and operation in general."

INFANT CARE

A Premature Infant Unit has been set up in the Hospital providing specialized facilities for the care of prematurely born children. This has resulted in the saving of many lives which were formerly lost because of inadequate facilities.

A special clinic was also established for babies born to mothers infected with syphilis. Heretofore such mothers have had their babies and were then forgotten. If the babies were infected that fact was made evident years later in lesions, blindness, in mental abnormalities and in early death. When a mother is found to be infected with syphilis, she is treated before the baby is born in an effort to eradicate the disease from her blood so that it cannot infect the blood of her child. If the child, after birth is found to be infected it too is treated, thus giving these children a better chance for a wholesome and healthy life. The clinic is not marked in any manner, so as to cause no embarrassment to the mother.

SERVICE MEN

Upon advice from the U. S. O. that hundreds of service men were sleeping in parks, upon floors of buildings, or walking the streets all night on weekends because of a shortage of rooms, and at the U. S. O.'s request, we have provided clean and wholesome sleeping accommodations for our boys in the service on the vacant floors of our Hospital. Between 450 and 500 service men are thus cared for each week. In appreciation, these boys contribute 50c each to a fund to provide medicine, braces, transportation, etc. for patients who are discharged from the Hospital and who are financially unable to supply their own medical and other necessities. This service has, as you may well appreciate, rendered a two fold benefit to the community and to the boys serving our Country.

INELIGIBLE PATIENTS

In order to prevent abuse of the privileges of the Hospital by patients who were ineligible according to law and who were financially able to pay, a system was set up whereby the Social Service Department under the able direction of Miss Louise Meyer is to investigate the financial status of applicants for admission. If they are found ineligible, they are referred to private institutions except in emergency cases, where they are admitted temporarily, given emergency treatment until such time as they may be removed to private institutions, and invoiced for the cost of their treatment. In view of the critical shortage of doctors, nurses and other personnel, we are thus able to better service the poor and indigent sick of the State for whom the Hospital was established. Invoices for the cost of hospitalization are also sent to all compensation and liability cases.

VENEREAL DISEASES

In cooperation with and at the request of the Commanding General of the Eighth Service Command and the Commander of the Eighth Naval District, and as a protection for the soldiers and war workers, we have entered into a contract with the Louisiana State Board of Health for the establishment of a Quarantine

Hospital for Women infected with venereal disease. The Delgado Building has been made available to the Louisiana State Board of Health for this service which will be operated by them as a Quarantine Hospital for women with venereal disease.

INFANTILE PARALYSIS

On October 26th, 1942, we established the first unit in Louisiana for the treatment of Poliomyelitis (Infantile Paralysis) by the Kenny method. The third floor of the old Female Medical Building was renovated, old beds and furniture repaired and this unit is now occupied and is functioning excellently. Doctors are highly pleased with its results. All patients under 21 years old will be admitted to this unit regardless of financial status but those who are financially able to pay are required to do so. This clinic does not conflict with private institutions as they do not accept such cases for hospitalization.

BLOOD PLASMA BANK

On October 26th, 1942, the Board of Administrators approved the establishment of a Blood Plasma Bank in the Hospital. This Bank is now ready for use and is another forward step in the advancement of improved hospital facilities in Louisiana.

SETTLEMENT OF HOSPITAL BUILDINGS

The main building of the Hospital is still settling, but the rate of settlement is decreasing as noted from the following record taken from readings furnished us by our Engineers, Mr. Frank H. Waddill and Mr. C. S. Crawford. These figures show the readings at the point of greatest settlement:

Date	Amount of Settlement
8/ 5/39	12.84 inches
9/25/39	12.96 inches
2/15/40	14.20 inches
2/15/41	15.00 inches
8/24/42	17.16 inches
4/ 8/43	17.86 inches

It will be noted that the total settlement of the building to April 8, 1943 is 17.86 inches at its greatest point. Our Board is having this very important development checked regularly as we believe that the matter is of such a serious nature that it bears constant watching. Complete reports and charts are on record at the office of Mr. F. W. Matthews, Secretary-Treasurer.

The following is an excerpt of the report dated October 19, 1943, by Mr. C. S. Crawford, our Engineer:

"The rate of settlement is declining but is not by any means negligible. The present rate at the worst point is of the order of 1-1/8 inches per year. The total settlement to the date of the latest observation exceeds by nearly 2 inches the prediction of Dr. Karl Terzaghi, who estimated 15.9 inches to that date and 17.8 inches by 1948, as compared with our findings of an actual 17.86 inches at present. The present rate of 1-1/8 inches per year is much in excess of his prediction of 0.7 inches as of this date."

AUTOMOTIVE EQUIPMENT

All automotive equipment (ambulances, etc.) are now in excellent condition and we believe adequate to take care of our normal needs for at least another year or 18 months.

BUILDINGS

It pleases us to report that with one exception, every building on the grounds of the Hospital (other than the main buildings) has been or is now in the process

of being completely repaired and renovated. We found practically all of the old buildings in very poor condition, some of them not having been repaired in over 15 years. The following is some of the work done, practically all of which was accomplished by our own employees, under the supervision of Carl L. Bendler.

The Contagious Building

This building was completely repaired, painted and renovated and a shelter built at the entrance for the convenience of visitors. Relatives of the patients are not (except in rare instances) permitted in this building, and they were formerly obliged to stand outside with no protection from the weather provided for them. This has been corrected by the erection of a proper shelter.

Old Ambulance House and Old Internes' Home

These buildings had been vacant since the new building was erected. They were completely renovated and built into living quarters for graduate nurses and female doctors employed by the Hospital. These nurses are charged a nominal fee per month for rooms and this has not only provided convenient low cost living quarters for the nurses, making service in the Hospital more attractive to them but we have operated these living quarters at an actual profit to the Institution.

Old Female Medical Building

The West wing of this building has been renovated and equipped as a Student Nurses' Dietetic Laboratory.

Sisters' Home

We have renovated and made necessary repairs to this building and redecorated the interior. The Sisters of Charity perform a valuable service to the Hospital and every effort should be made to provide comfortable living quarters for them.

Dibert Tuberculosis Building

The interior of this building was in exceptionally bad condition. All plaster walls were repaired and the interior was thoroughly repaired and repainted.

Nurses' Home

This building was repaired and remodeled to care for the heavy increase in Student Nurses due to the war demands. It is now occupied 100%.

Colored Tuberculosis Building

The first floor of this building was remodeled and equipped for a clinic for the care of Tuberculosis cases.

Thilberger Property

This property has been completely repaired and renovated.

Because of the fact that many entrances to the Hospital were used by employees as well as the public at large, there was wide spread pilfering going on in the Hospital undoubtedly costing the State many thousands of dollars. Proper entrances were provided for with a guard at each entrance and we now have control over the former heavy losses in linens, surgical instruments, etc.

AIR RAID PRECAUTIONS

Extensive precautions and arrangements have been made by the Hospital for the protection of the buildings and the patients in the event of an air raid. Provisions have been made for the complete blackout of the building and for the

use of the operating and other emergency rooms during a blackout. Protection of the power plant, operating rooms, radium supply, etc. were carried out to the extent that present finances permit.

LUNG STATION

On December 16th, 1943 a Lung Station was established for persons to be subjected to surgery in connection with Tuberculosis and other Lung ailments. Ability of patients to stand the surgical treatment is determined by examination given in this Lung Station and unquestionably many lives are being saved because this remarkable equipment is now available to the doctors.

NURSING SCHOOL

No applicants need now be kept from training as a nurse because of financial inability to pay the cost of tuition. The United States Government has provided us with a fund of approximately \$28,000.00 for student nurse scholarships and \$5,000.00 for Refresher Courses to bring the older and inactive nurses into service again. This was supplemented by a fund of \$8,000.00 of additional funds from monies bequeathed to the Hospital for scholarships other than those provided by the Federal Government.

Refresher Courses have been established for inactive Registered Nurses to help fill the gap left in civilian needs by so many regular nurses going into the armed services and accepting more lucrative positions in large industrial plants where nursing service is required.

Because of the acute shortage of nurses and in compliance with the recommendations of Sister Henrietta, Director of the School of Nursing, the Board entered into a contract with Dillard University for the training and services of colored nurses who are being used to administer to colored patients of the Hospital. In view of the serious situation facing us, your Board carried out over the radio and through the press, a campaign for 200 student nurses. This goal was attained.

CHARITY HOSPITAL GUILD

This remarkable organization, with Mrs. C. W. Gilmer as its president, has performed a great service to the Hospital. Without compensation, these women devoted many hours of their time to service in the Hospital and prepared 5,863,990 dressings for our patients. The State of Louisiana and the Board of Administrators owe them a great debt of gratitude.

LITIGATION

On March 2nd, 1937, Mrs. Celanire Corrijolas bequeathed to Charity Hospital part of her estate valued at approximately \$215,000.00 provided that the Hospital "shall within the shortest space of time after my death erect and dedicate a building or buildings to be used for hospital purposes commensurate with the value of the legacy." Your Board prepared plans for a building to be used as a waiting room for the admission of patients and asked the Court to approve the plans as being in full compliance with the provisions of the will, and called on the Executrix for delivery of the legacy to the Hospital. Three alternative Legatees and one alternative Heir filed opposition to the surrender of the property to the Hospital and on May 14th, 1943 Judge Renee A. Viosca ruled that the Charity Hospital had lost its right to the legacy because of delay in erecting the building and ordered the Estate to be partitioned to alternate Legatees. This decision was appealed by the Board.

On May 15th, 1943 arbitration award made in December 1940 in which the Burkes Brothers, Contractors, were denied claims for \$42,827.67 against the Charity Hospital was upheld by Judge Paul E. Chasez. This case has been ap-

pealed by Burkes Brothers. Until such time as this case has been finally decided the unpaid amount of the architectural fee of the Weiss, Dreyfus, & Seiferth Company is being held up for the protection of the Hospital.

ELECTROENCEPHALOGRAPH DEPARTMENT

A type "B" Electro-encephalograph was purchased for the diagnosis and treatment of neurological diseases and a room in the main building on the fifth floor adjacent to the Heart Station was shielded and arranged so that tests could be made under desired conditions. Since this machine is the only one of its kind in the State, we have made it available for use by private hospitals and private physicians.

RULES, REGULATIONS AND BY-LAWS

At the present time the Hospital is being administered under By-Laws, Rules and Regulations dating back to 1918. The Rules, Regulations and By-Laws are now in the process of revision. A new organizational chart has been prepared by Dr. O. P. Daly, Director, and operation of the Hospital has not only been streamlined but budgets set up for each department and the Institution is being operated on a sound, businesslike and economical basis.

In conclusion I want to acknowledge in behalf of our Board, the full cooperation of Mr. Claude Harrison, Director of the Department of Institutions and Dr. O. P. Daly, Director of the Charity Hospital, the Sisters of Charity, Mr. Fred W. Matthews our Secretary-Treasurer, and Mr. L. A. Millet our Accountant. Without their advice, understanding and assistance, our Board could not have functioned as efficiently and as smoothly as we have. Our indebtedness to these men is hereby gratefully acknowledged.

In view of the critical financial situation at the outset of this year, together with the acute shortage of key personnel due to the war, we have operated under a very severe handicap but you may be sure that each and every member of the Board of Administrators served conscientiously and to the best of his ability and we sincerely hope that this report of our administration of the affairs of the Institution from July 1st, 1942 to June 30th, 1943 will meet with the full approval of you and the public at large.

Sincerely,

LOUIS G. RIECKE, Vice-President,
Board of Administrators,
Charity Hospital of Louisiana
at New Orleans

CHARITY HOSPITAL OF LOUISIANA AT NEW ORLEANS

December 15, 1942.

His Excellency
Governor of the State of Louisiana,
Honorable Claude Harrison, Director
Department of Institutions
Board of Administrators
Charity Hospital of Louisiana

Gentlemen:

As Director of the Charity Hospital of Louisiana at New Orleans, I submit the following report of its activities for the fiscal year, July 1, 1942 to June 30, 1943, inclusive.

Administrative Department Changes:—Upon completion of their appointments, the resignations of assistant clinical directors Doctors O. V. Prejean, L. J. O'Neil, and P. J. Thomas were presented and accepted.

Doctors L. C. Paggi, J. DiLeo, and J. L. Holmes were appointed as assistant clinical directors for the fiscal year, and upon completion of their agreements, their resignations were presented and accepted under date of June 30, 1943.

Mr. Herbert A. Ricks, Purchasing Agent, was given military leave of absence effective July 18, 1942.

The Department of Institutions very kindly loaned this Hospital the services of Mr. T. G. Trotti as Acting Purchasing Agent from July 1942 to December 31, 1943. Following his departure, the Department of Finance loaned this Hospital the services of Mr. H. F. Weihmann for several months until Mr. August Lestelle assumed full responsibility as purchasing agent for this Hospital.

This constitutes the major changes in the Administrative Staff of the Hospital insofar as department heads or administrative officials are concerned.

Countless numbers of changes have taken place in the personnel of the Hospital and this constant turn-over and loss of trained personnel has constituted one of the most difficult problems this Hospital has had to meet during this fiscal year.

Hospital Buildings—The main building of the Hospital has continued to settle. A detailed report of this settlement, with appropriate charts showing rate of settlement, has been forwarded to the Department of Institutions, and to the Board of Administrators of this Hospital.

Because of this settlement, it is necessary to maintain a staff of workers to repair the damages caused by the settlement of the building. These consist of cracks in the walls of the Hospital, stone work, concrete structures, and, in some instances, shifting of the metal frame work of the building. The estimated annual cost to the Hospital for this work alone is approximately \$45,000.00. Unquestionably this will continue to be an item of expense to the Hospital. It is believed, however, that the expense will decrease rather than increase as the rate of settlement becomes more stabilized.

The main building of the Hospital has been kept in an excellent state of repair. The following are some of the alterations which have been made within the main building:

An employees' entrance has been set up and properly equipped with a card system and time-clock, by means of which employees check in and out of the Institution. All employees are required to use this entrance and a guard is on

duty at all times. This guard carries out a rigid inspection of all packages carried by employees.

In the basement of the main building of the Hospital, the space set aside for the storage of hospital histories has been rearranged for the accomodation of the Unit Record System, which is now in effect in this Hospital. The problem of space for the future storing of hospital records will, in the near future, become rather serious. At the present time, ample space is available.

By rearrangement of space in the basement of the main building, a separate dining room, well organized and equipped, has been set up for use of the colored nurses and colored employees of this Hospital.

The Board of Administrators authorized the purchase of an electro-encephalograph and the setting up of a budget for the operation of this equipment, which was done under the supervision of a part-time director. This department is now functioning and is the only department of this kind in the State of Louisiana, and one of the few in the United States. Space was set aside for this purpose on the 5th floor and the rooms were properly prepared and screened for the reception of this equipment.

A reorganization of the neurological and psychiatric services in the main building of the Hospital was effected and steel protective guards have been installed on the doors and windows of these wards. While this does not completely fulfill the requirements for a psychiatric unit, it is the best the Hospital could do under the existing circumstances.

Space has been set aside on the 12th floor of the main building and is being equipped for the reception of the equipment for the blood plasma bank. A great deal of difficulty has occurred in obtaining the necessary equipment for setting up this unit; however, at the close of the fiscal year a great deal of the equipment has been obtained, arrangements were being completed for the operation of this department, and we hope to have it in operation during the next fiscal year.

The Isolation Building for the care of contagious and infectious diseases is being completely renovated and painted. A suitable front entrance has been provided for this building. Upon completion of the present work, this building will be in an excellent condition.

The Dibert Tuberculosis Hospital has been completely renovated and painted and is being maintained in a satisfactory condition.

The Colored Tuberculosis Building is badly in need of repairs and renovation. Because of settlement, a separation has occurred between two units of this building. This will necessitate tearing down and rebuilding this connection. Funds have been set aside for the complete renovation of this entire building. The renovation of the lower floor of this building has been completed.

The building set aside for the use and occupancy of the Sisters of Charity has been entirely renovated and placed in an excellent condition.

The Delgado Memorial Building was leased to the Louisiana State Board of Health for use as a venereal disease control unit. The eState Board of Health, under its contract, is proceeding with the complete repair and renovation of this building. Upon completion of these repairs, a venereal disease control project, under the supervision of the Louisiana State Board of Health, will be set up and maintained in this building. The contract between the Louisiana State Board of Health and the Board of Administrators of this Hospital is on file in the office of the Charity Hospital and is available for inspection.

The first floor of the female medical building has been completely renovated. The printing shop occupies a portion of this floor. In this shop, hospital charts, forms, stationery, and other printed material used in this Hospital, are prepared. The remaining portion of this floor is used as a dietetic laboratory for use by the student nurses and dietitians of the Charity Hospital.

The third floor of this building has been completely renovated and is used as a Kenny Unit for the treatment of infantile paralysis by the Kenny Method. This is a joint project between the Crippled Children's Division of the State Board of Health and the Charity Hospital, and is the only unit of this kind in the State of Louisiana, and one of the few approved units in the United States. A complete report of the activities of this unit by Dr. Branch Aymond, Director of this department, is attached to the report.

The second floor of this building is, at present, not in use, but we anticipate it will be necessary to open this floor in the very near future as an addition to the Kenny Unit.

The Lapeyre-Miltner Building is in an excellent condition as it was completely renovated during the past few years.

At the close of the fiscal year, only the lower floor of the Lapeyre-Miltner Building was in use; however, very definite arrangements for its future use are being considered.

The building known as the Old Ambulance House has been completely renovated and is at present occupied by the female doctors of the Resident Staff of this Hospital.

The Nurses' Home has been kept in a state of good repair and a great deal of work has been done in the Nurses' Home in order to satisfactorily care for the increased number of nurses in the under-graduate student body.

The kitchen and dining rooms in the Student Nurses' Home have been reopened in order to care for the enlarged student body.

The laundry, the warehouse, the power-house, the carpenter shop, the ambulance house, garages, and other buildings belonging to this Hospital have been kept in a satisfactory state of repair.

Resident Staff—The Hospital has experienced great difficulty in maintaining a resident and intern staff, as well as a staff of visiting physicians. It is interesting to know that since Pearl Harbor, this Hospital has sent over four hundred doctors into the armed forces of our Government. This has been a severe strain upon this Institution and has, of a necessity, crippled the services of the Hospital.

At the close of the fiscal year, the Hospital had eighty-five interns and one hundred-and-three resident physicians, whereas the normal quota should be approximately one hundred-and-fifty interns and one hundred-and-seventy resident physicians.

The maintenance of a satisfactorily trained staff of physicians, nurses, and trained personnel is an absolute necessity in a hospital. This constitutes probably the largest single difficulty which has faced this Hospital and, in all probability, will face this Hospital for the duration of the present war. Apparently, there is no absolutely satisfactory solution.

The Hospital has been forced to avail itself of the services of externs who are under-graduate medical students, members of either the junior or senior medical class of Tulane or Louisiana State University. These young men receive no salary from the Hospital, but are given full maintenance in return for which they perform certain functions within this Hospital. At the close of the fiscal year, approximately thirty externs were on duty in this Institution, and their services have been of great value to the Hospital.

In spite of this loss of trained personnel, the Hospital has been able to maintain satisfactory services to our patients. This because of the self-sacrifice of the remaining personnel and their devotion to duty. Too much credit can not be given to the Visiting Physicians who donate their services to this Hospital—to the

Sisters of Charity—to the nurses—and to the interns and resident physicians who have worked indefatigably under most adverse conditions, and to the employees who have been most generous with their services.

Nursing Staff—At the close of this fiscal year, the Hospital had in its employ three hundred-and-fifteen graduate nurses, whereas the normal complement of nurses for this Institution is six hundred-and-seventeen, and the Hospital is constantly losing additional nurses.

I am unable, at this time, to state how many hundred of nurses have gone from this Hospital into the armed forces of our Government. We have endeavored to solve this problem by increasing the student body of the School of Nursing in this Hospital—by instituting refresher courses for older nurses who had discontinued the practice of their profession—and by training Volunteer Nurses Aids. At the close of the fiscal year, this Hospital had graduated four hundred and sixty Volunteer Nurses Aids, many of whom, on a purely voluntary basis, are giving most satisfactory services within this Institution.

We are also making use of the services of the Gray Ladies, who work on a voluntary basis, and who serve in many capacities in this Institution, as well as the Red Cross Canteen Workers.

Numerous other voluntary organizations and individuals have donated their services to this Institution. Without the aid and assistance of these volunteers in these various groups, the Hospital would have found it most difficult to function. They deserve and receive our thanks and appreciation.

This Hospital has taken advantage of the Nursing Program organized by the Federal Government and has increased our student body from the usual number of approximately two hundred under graduate nurses to two hundred and eighty-two at the close of the fiscal year, and during the next fiscal year, arrangements have been made by which this Hospital will increase its student body to approximately eight hundred. The expense of this program will, to a large extent, be defrayed by the Federal Government of the United States as a war measure. A detailed report of these activities by the Sister in charge of this group is attached.

Personnel—Practically all employees of this Institution are now under the supervision of the Civil Service Department of the State of Louisiana. Every position in this Institution has been classified and all salaries have been set up under the Pay Plan of the State Civil Service Department. Because of the increased cost of living, and in order to meet competition, it has been necessary to increase the salaries paid to employees in this Institution, and unquestionably additional increases will have to be granted.

Particular attention has been paid to the low-salaried groups and all these groups have received increases in salary. Undesirable employees have been weeded out so far as is possible under existing conditions, and new employees are required to meet the requirements of the Civil Service rules and regulations. The turn-over among the employees of this Institution has been terrific. This Hospital is situated in a City which has a great many commercial plants devoted to war work, and many of our trained employees have accepted these more desirable and more remunerative positions.

During the past fiscal year, the WPA was discontinued and this Hospital lost the services of approximately two hundred individuals who had been assigned to different departments of this Institution.

Hospital Activities—The Admitting Rooms of the Hospital were reorganized. This was necessary because of the loss of the full-time physicians who were assigned to this department. The only possible solution of the problem was to rotate interns and residents throughout the Admitting Rooms. Under present

conditions, it is impossible to obtain the full-time services of acceptable physicians for this, one of the most important departments of this Institution, where approximately five hundred patients are seen each day. The Hospital does not feel this is a satisfactory solution of the problem, but until more physicians are available for civilian use, we see no other solution.

A lung station has been set up on the first floor of the colored tuberculosis building. The purchase of this equipment and the opening of this unit was made possible by a donation from Mr. S. W. Labrot, Junior. The purpose of this unit is for the proper evaluation of lung functions and is of great assistance in determining chest conditions and whether patients, who are in need of chest surgery, are satisfactory operative risks.

Mention has already been made of the Electro-encephalography Department, which is under the supervision of a part-time director.

The Board of Administrators authorized the purchase of x-ray equipment for the Colored Tuberculosis Building to take the place of x-ray equipment which had become obsolete and dangerous.

The Hospital has organized and set up and equipped on the lower floor of the Colored Tuberculosis Building a clinic for the exclusive use of ambulatory patients who have tuberculosis, thus affording complete segregation of both bed and ambulatory tuberculosis cases.

On the ninth floor of the main building, a unit for the care of pre-mature and special infants has been set up. This was necessary because of the high mortality in these cases. The results have already been shown in a marked reduction in mortality among these patients.

All of the clinics which were closed during the recent crisis through which this Hospital passed, have been opened with the sole exception of the Salvarsan Clinic, and arrangements have been made to open this clinic during the next fiscal year.

The Hospital has established and is maintaining reclaimed gauze project, using voluntary labor. In this unit, gauze which had been previously used, is laundered, stretched, made into pressings, sterilized and set aside for use in any emergency which the Hospital may face. At the close of the fiscal year, 900,000 dressings had been prepared. This at no cost to the Hospital, as the work is done by volunteers and the material used had previously been discarded.

The Charity Hospital Guild, under the direction of its president, Mrs. C. W. Gilmer, has continued to function in a most satisfactory manner. The workers in the Guild are all voluntary workers. During this fiscal year, the Guild prepared for use in this Hospital 5,304,789 dressings. This is a most worthwhile service, and a great deal of credit is due these ladies, who so freely give of their time to this worthwhile project.

Other projects worthy of note is the work done on a voluntary basis by the ladies who organized a project for the purpose of preparing dressings for cancer and similar cases.

Organization charts covering the complete organization of this Hospital have been drawn up and placed in each department of the Institution. By means of these charts, each employee in this Institution definitely knows his position and knows to whom he is responsible. This has assisted greatly in maintaining proper discipline throughout the Institution and in avoiding duplication of work.

Because of inability to obtain sufficient beds for transient soldiers, the United Service Organization has asked the Hospital to assist them, and, at the present time, over each week-end, this Hospital cares for approximately five hundred

soldiers, who, otherwise, would have to sleep in the lobbies of hotels or even on the streets.

Patients Served—During the past fiscal year, the Hospital had an average of 1,677 in-patients, with a total number of 38,733 patients for the year, and a total of 612,315 hospital patient days.

During this same period of time, the Out-Patient Department had a daily average of 648; a total number of 174,957 clinic visits.

The Admitting Rooms had a daily average of 497, and a total of 181,405.

The Accident Rooms had a daily average of 128, and a total number of 46,844.

The above figures show that this Hospital cared for a daily average of 2,950 patients.

A complete financial statement of this Hospital for the past fiscal year is attached to this report.

Sisters of Charity—The Sisters of Charity of St. Vincent de Paul, have served this Institution and its patients since 1834. During this entire time, they have served without any contract or written agreement with the Hospital. At their request, during the past fiscal year, a contract covering their services was drawn up. This contract was acceptable to all and was signed by the Governor of the State, by the Vice-President of the Board of Administrators of the Hospital, by the Secretary-Treasurer of the Hospital, by the Director of the Hospital, and by the Sisters. A copy of this contract is on file in the Hospital.

At this time, I should like to pay tribute to the Sisters of Charity. Without their aid and assistance, it would have been almost impossible to have carried on the functions of this Hospital. They have worked unceasingly for the welfare of the patients in this Institution. They have aided in maintaining morale in this Institution and their influence is directly responsible for the high spirit of cooperation which exists in this Hospital.

I should like to express appreciation to the members of the Board of this Hospital, who have been most cooperative, and who have freely given of their time, advice and counsel, in all affairs relative to the Hospital.

I should like to express appreciation to the Governor of the State—to the Legislature—to the Director of the Department of Institutions—to the Sisters of Charity—to the members of the Visiting, Resident and Intern Staffs—to the nurses—and to all of the employees of this Institution for their cooperation and for the assistance in maintaining this Institution throughout the year.

Respectfully submitted,

O. P. DALY, M. D.

June 30, 1943.

Dr. O. P. Daly, Director
Charity Hospital of Louisiana
New Orleans, Louisiana

Dear Sir:

The Accounting Department herewith presents the Annual Report on the financial condition of the Charity Hospital of Louisiana at New Orleans, and comments on cost of operations for the fiscal year July 1, 1942 to June 30, 1943.

The Report is composed of the following Exhibit and Schedules:

Exhibit	I	Balance Sheet
Schedule	I-A	Statement of Income and Expenditures
Schedule	I-B	Surplus and Deficit Account
Schedule	I-C	Visitors Food Service Operation
Schedule	I-D	Unexpired Insurance Premium
Schedule	I-E	Capital Assets-Hospital Buildings
Schedule	I-F	Capital Assets-Hospital Equipment and Furnishings
Schedule	III	Statement of Miscellaneous Income
Schedule	IV	Summary—Operating Expenses
Schedule	VI-B	Special Funds for Designated Purposes
Schedule	VI-C	Unrestricted Endowment Funds
Schedule	VI-D	Restricted Endowment Funds
Schedule	VI-E	Endowment Funds—Income Statement
Schedule	VI-F	Endowment Funds—Statement of Expenditures
Schedule	VII-B	Comparative Statement of Monthly Cost of Operation
Schedule	VII-B1	Comparative Statement of Cost of Operations— Fiscal Years 1941-42 and 1942-43
Schedule	VII-C	Admissions by Parishes
Schedule	VII-D	Number of Employees on Payroll
Schedule	VIII-A	Statement of Bond Obligation—Serial Bonds 1936
Schedule	VIII-B	Statement of Bond Obligation—Serial Bonds 1938

Respectfully submitted,

L. A. MILLET
Chief Accountant

CHARITY HOSPITAL OF LOUISIANA AT NEW ORLEANS

Comments on Cost of Operations for the

Fiscal Year July 1, 1942 to June 30, 1943

GENERAL FUND CASH—\$306,127.99

We have closed our fiscal year with a substantial cash balance. Offset against this amount are outstanding liabilities amounting to \$191,476.46, leaving an unencumbered cash balance of \$114,651.53 in the General Fund Account, to which must be added a cash balance of \$110,825.00 in the Bond Liquidation Fund Account, leaving a total unencumbered cash balance of \$225,476.53 at the end of the fiscal year. This compares with a cash deficit amounting to \$128,912.99 at the end of the fiscal year 1941-42.

EMPLOYEES LIABILITY INSURANCE FUND—\$2,641.45

Balance in Fund June 30, 1942	\$1,318.61
Transferred from General Fund during fiscal year (150.00 monthly)	1,800.00
	<u>3,118.61</u>
Compensations paid to employees during fiscal year	477.16
	<u>2,641.45</u>

By carrying its own Compensation Insurance, the Hospital saved approximately \$6,700.00 during the fiscal year.

PATIENTS ACCOUNTS RECEIVABLE—\$82,771.22

During the fiscal year billings against ineligible patients amounted to \$55,-443.80. Total collections amounted to \$23,868.14. Uncollectible accounts charged off amounted to \$46,471.10. Many old accounts carried on the books for a good many years were found to be uncollectible and were charged off during the fiscal year. We have set up a bad debt reserve of \$63,905.72 against the Patients Accounts Receivable.

Compared with the fiscal year ended June 30, 1942, the Inventory of Materials and Supplies increased \$9,579.82, accounted for as follows:

INVENTORY—MATERIALS AND SUPPLIES—\$93,672.47

	June 30, 1942	June 30, 1943	Increase
Drugs and Chemicals	\$14,786.13	\$15,426.30	\$ 640.17
Food and Groceries	5,286.83	9,976.20	4,689.37
Household Supplies	11,895.57	19,185.81	7,290.24
Office and Multigraph Supplies	6,058.25	4,899.95	1,158.30*
Maintenance Department Supplies and Materials	22,262.21	26,129.51	3,867.30
Visitors Food Store Supplies		899.07	899.07
Surgical Supplies	23,803.66	17,155.63	6,648.03*
	<u>84,092.65</u>	<u>93,672.47</u>	<u>9,579.82</u>

*Denotes red figure.

It is to be noted that the Inventory of Surgical Supplies compared with the Inventory at the end of June 30, 1942 was reduced \$6,648.03. The reason for this is that we are now compelled to make our purchases in practically all types of surgical supplies in much smaller quantities.

BOND LIQUIDATION FUND—\$110,825.00

Cash Balance in Fund June 30, 1942	\$186,625.00
Received from State Franchise Tax Fund	800,000.00

986,625.00

Bonds Retired:

1936 Issue	\$ 94,000.00	
1938 Issue	100,000.00	194,000.00

Interest Paid on Bonds:

1936 Issue	160,545.00	
1938 Issue	160,590.00	321,135.00

515,135.00

Balance June 30, 1943	471,490.00
-----------------------	------------

Reserve June 30, 1943:

Retirement of Bonds:

1938 Issue due August 1, 1943	104,000.00
1936 Issue due October 15, 1943	98,000.00

Accrued Interest on Bonds:

1938 Issue due August 1, 1943	84,700.00	
1936 Issue due August 15, 1943	73,965.00	360,665.00

Amount to be transferred to Operating Fund	110,825.00
--	------------

CAPITAL EXPENDITURES—\$19,669.76

Of the total expenditures for capital assets during the fiscal year, \$16,536.83 represented purchases of equipment out of the General Fund, and \$3,132.93 out of the Building and Equipment Fund for the purchase of Dietetic Equipment installed in the Old Female Medical Building.

HOSPITAL INCOME—\$93,658.26

Compared with the fiscal year ended June 30, 1942 the Hospital Income shows a net increase of \$15,588.48, accounted for as follows:

	1941-42	1942-43	Increase
Patients Services	\$17,243.62	\$23,868.14	\$ 6,624.52
Amusement Licenses	19,587.00	18,972.75	614.25*
Fees	27,117.70	23,680.78	3,436.92*
Miscellaneous	14,121.46	27,136.59	13,015.13
	78,069.78	93,658.26	15,588.48

*Denotes red figure.

SISTERS' DIVISIONS

To the Board of Administrators and
Doctor O. P. Daly, Director,
Charity Hospital of Louisiana at New Orleans:

Gentlemen:

While the study of the administrative organization of the Hospital was in progress with the representatives of the Governor's Reorganization Staff in 1941, it was decided to group the hospital divisions now managed by the Sisters of Charity under the general title of Sisters' Division and to show the position of the Superioress of the Sisters as the Director of the Sisters' Divisions. The Sisters' Divisions include the following: Nursing, Out-Patient, Dietary, and Housekeeping. The Director of each of these departments has compiled her own report for the fiscal year beginning July 1, 1942 and ending June 30, 1943. These reports follow in consecutive order.

In introducing the reports from the Sisters' Divisions it seems fit to mention that during the many years that have elapsed since their arrival in 1834, the Sisters have watched the progress of the hospital with the keenest interest and solicitude. They have shared alike in the successes and in the failures of this ever growing institution, and they have experienced the bright days as well as the dark periods in its history. When the magnificent facilities of the new Charity Hospital were opened to the poor sick of the state, no one rejoiced more than they. Today, with constant solicitude they strive to preserve the efficiency of the hospital so that the patients will continue to receive needed care, despite the critical times which have resulted from the war.

The establishment of a state department of Civil Service dedicated to preserve the rights of employees according to the merit system, was welcomed by the Sisters in 1942. This great step deserves the highest commendation, and we hope that the principles of justice which animated those responsible for its founding will be firmly adhered to in the years to come.

The Sisters are happy to use this medium to express their sincere appreciation to the Board of Administrators and to the Director of the Hospital for their constant assistance and unfailing interest. Their support and understanding have greatly lightened the burden of responsibility which has fallen so heavily upon the Sisters during this critical war emergency.

We also wish to express sincere gratitude to the Assistant Clinical Directors, to the Visiting, Resident, and Interne Staffs, and to the Heads and Staffs of all Departments for their generous assistance and cooperation at all times during the year.

Respectfully submitted,

SISTER STANISLAUS,
Director, Sisters' Divisions.

NURSING DIVISION

To the Board of Administrators and
Doctor O. P. Daly, Director,
Charity Hospital of Louisiana at New Orleans

Gentlemen:

At the close of the fiscal year ending on June 30, 1943, the Nursing Department wishes to submit the following report.

The national war emergency has meant to us a constant struggle to uphold insofar as possible the standards which have been built up over a period of years rather than a time during which to attempt further achievements. Therefore while it has not been possible for us to initiate new programs, it is gratifying to know that in spite of the difficulties which the Nursing Department has faced there has been no notable lowering of the level of nursing care given to our patients or of the quality of instruction offered our student nurses.

As in previous years, the report of the Nursing Department will consist of two main sections, representing the two chief functions of the Department. The first will be that of the Nursing Service Division, which will be followed by the report of the School of Nursing.

NURSING SERVICE DIVISION

Reduction of Staff and Use of Volunteers

The greatest problem which faced the Nursing Service Division during the past year was that of continued loss of personnel. The graduate nursing staff was reduced from 456 on June 30, 1942 to 315 on June 30, 1943. A total of 142 nurses have left our staff to go into military service. As the graduate nurse staff has decreased, there has been a corresponding increase in the number of student nurses enrolled in the School of Nursing. While the students have assumed more responsibility for nursing service than formerly, they require constant supervision and this has been difficult to maintain due to the large turnover in the head nurse and supervisory staff.

There has also been a great turnover among our auxiliary workers. The number of men leaving to enter military service or to take better paying defense positions has left a depleted orderly staff. While the substitution of women for men has been satisfactory in many positions, it does not entirely answer the problem, and some of the male divisions are suffering in consequence of the impossibility of employing orderlies. In the spring of 1943 the Works Progress Administration project was discontinued, and this also deprived us of the use of many men and women who were serving in the capacity of orderlies and ward helpers.

Volunteers have been used in increasing numbers during the past year. The Volunteer Nurse Aide classes, which were begun in 1942, have continued under the sponsorship of the American National Red Cross. These provide the local hospitals with nursing aides who are capable of performing many procedures which release our nursing staff for the more skilled tasks. We are greatly indebted to the 312 white and colored aides who contributed a total of 26,334 hours of service during this past year.

Red Cross Canteen Workers are also making a big contribution in assisting with the service of meals to patients. Other volunteer groups are serving in the Reclaimed Gauze Unit and in the Guild Room, where dressings and other needed surgical supplies are made for immediate use or for reserve stock in case of emergency.

Closing of Floors

Three of the large hospital floors in the main building, sixth, seventh, and eleventh, have been closed to patients because of the shortage of medical and nursing personnel. Services were so greatly reduced through the concentration of patients that there is a constant problem of "over patients" who must be given beds in wards other than those to which they have been assigned. Only one side of the Out-Patient Department has been in operation due also to the shortage of personnel.

Defense Activities

Throughout the year the Nursing Department has continued to participate in defense activities. We cooperated with the Director of the Traffic Department in the compilation of a Manual of Air Raid Precautions for Charity Hospital, and plans are underway for the instruction of personnel in their responsibilities in case of bombing or other emergency.

The Reclaimed Gauze project, which was begun last year, has been carried on successfully, and we are constantly storing reclaimed dressings for a possible emergency. Approximately 900,000 surgical dressings now constitute our reserve supply.

Raises in Salary

Increases in salary were given to various groups within the Nursing Department at times when budget adjustments were made. The beginning salary for general staff nurses was increased in November, 1942, to \$95.00 monthly. In June, 1943, the salaries of auxiliary workers were increased to \$55.00 monthly for women, and \$65.00 for men. However, these salaries are still too low to compete with existing pay rates in the community.

Civil Service

Charity Hospital employees were taken over by the Department of State Civil Service on January 1, 1943 and the new pay plan and classification of personnel became effective on that date. Some adjustments in salary were necessary for individuals whose salaries did not conform with the pay plan. Faculty members and student nurses were placed in the unclassified service. The Nursing Service Division is appreciative of the cooperative relationship which exists between the Department of State Civil Service and the hospital.

Kenny Unit

At the solicitation of the Division of Crippled Children Services, Louisiana State Department of Health, a twenty-eight bed unit for the Kenny treatment of acute anterior poliomyelitis was opened on January 15, 1943 on the third floor of the Female Medical Building. The Nursing Department assisted in equipping this unit and in drawing up policies for its administration. Although the unit is staffed by personnel employed through the State Department of Health, they are subject to regulations governing nurses and other employees in Charity Hospital. It is anticipated that in the near future student nurses will be rotated through this division for experience in this new method of treating poliomyelitis.

Special Infant Unit

In March, 1943, four wards on the center back wing of ninth floor were opened as a Special Infant Unit, and premature infants were transferred to this division. A nurse with training in the care of premature infants was assigned as head nurse, and additional staffing was supplied. While equipment and construction work are still needed in the Unit, the enlarged floor space has allowed for better segregation of infants, and the mortality rate has already decreased sharply.

SCHOOL OF NURSING

The heavy demands of the military services for enlistment in the army and navy nurse corps have caused a tremendous increase in the number of students in schools of nursing throughout the country. To aid in recruitment, federal funds made possible attractive scholarships for needy applicants. Recognizing the contribution which we are in a position to make because of our splendid clinical and instructional facilities, and realizing also that student nurses must replace the graduate nurses leaving our staff, our school of nursing spared no effort to increase enrollment this year.

Statistics

The statistical report will be shown with figures for 1941 and 1942. It tells its own story of the heavy teaching load assumed by the faculty in the School of Nursing, which was increased to meet the needs of the two new classes of approximately one hundred students each.

STUDENTS IN THE SCHOOL OF NURSING

	1941	1942	1943
Charity Hospital Students	185	227	292
Affiliating Students	47	91	110

Students Receiving Degrees from L. S. U. Department of Nursing Education	7	12	12

Student Assistance

A total appropriation of \$28,268.36 was made to the Charity Hospital School of Nursing by the United States Public Health Service during the year. Of this amount, \$26,978.36 was applied to the basic nursing program and the remainder, \$1,290.00, to the refresher course project for inactive, registered nurses. Federal scholarships of \$160.00 each covering entrance fees were awarded to 72 students, and the remainder of the money was used for payment of salaries of instructors and a clerical worker, and for the purchase of equipment and supplies. A large sum was also paid directly to the hospital for maintenance of students.

Under the terms of the Bolton-Bailey Act, which was signed by President Roosevelt on June 15, 1943, federal assistance will again be available to schools of nursing during the coming year, through the Cadet Nurse program.

During the year, two new loan funds for the assistance of student nurses were established. The first of these, which amounts to \$8,000.00, was set aside by the Board of Administrators to cover entrance fees for needy applicants who did not wish to apply for federal scholarships. The second was made possible by the Kellogg Foundation, which made a gift of \$4,000.00 to our School of Nursing, for the assistance of students already enrolled in the school.

Accelerated Program

Conforming to recommendations made by the National League of Nursing Education, the School of Nursing this year began to draw up plans for an accelerated thirty-month program of theory and practice. In mapping out the students' curriculum for the duration, a conscious effort has been made to concentrate theory and clinical practice by reducing the total hours, without elimination of actual necessary content. Although all required work will be completed in thirty months, students will not graduate before the completion of the usual 36 month period of training. It is expected that many of the senior students during their last six months will be assigned to replace graduate staff nurses.

Experience in Tuberculosis Nursing

Following a long period of preparation within the Dibert Memorial Building, student nurses were assigned there on July 1, 1942, for tuberculosis nursing experience. During their month in the building, they are given a well-rounded picture of the clinical treatment of tuberculosis, a disease which constitutes one of the most important public health menaces in the state of Louisiana.

RECOMMENDATIONS

The Nursing Department again wishes to recommend that bedside curtains or screens be provided for the wards to insure privacy of patients.

The Special Infant Unit is also in need of additional equipment and some construction work. It is recommended that an effort be made to supply these needed facilities as far as it is possible under existing priority restrictions.

We likewise recommend that certain repair work and painting that are badly needed in the Student Nurses' Residence be started immediately.

APPRECIATION

At the close of this trying and busy year, the Nursing Department wishes to extend sincere words of appreciation to the Board of Administrators, to Doctor Daly, and to his Assistant Clinical Directors for their interest and constant efforts in behalf of the problems and plans presented for their consideration and approval. We also wish to express our gratitude to all who have contributed to the educational and health programs in the School of Nursing. It is fitting that we should give special mention to Doctor Burns, Dean of the Louisiana State University School of Medicine and members of his faculty, who have made such a great contribution to the instructional program of our school.

Respectfully submitted,

SISTER HENRIETTA, Director,
School of Nursing and Nursing Service.

OUT-PATIENT DEPARTMENT

To the Board of Administrators and
Doctor O. P. Daly, Director,
Charity Hospital of Louisiana at New Orleans.

Gentlemen:

The Annual Report of the Out-Patient Department for the fiscal year beginning July 1, 1942 and ending June 30, 1943 is herewith submitted.

Due to the financial crisis facing the hospital, the entire Out-Patient Department was closed on July 1, 1942, and it remained closed until July 30, 1942 when the colored wing only was reopened. During this period many employees resigned and others were discharged because instructions were received to reduce personnel.

Under the new clinic schedule, twenty-eight clinics were opened on July 30. White and colored patients are seen on alternating days. The Salvarsan Clinic, however, one of the largest in the Out-Patient Department, was not reopened and this has caused much comment due to inadequacy of facilities in the city for the anti-luetic treatment. Three new clinics, surgical dressings, tumor, and obstetrical syphilis, have been opened during the past year.

ACTIVITIES

There is little to report in the nature of improvements and added functions. Because of the war crisis we have the same problems as those confronting every department, namely, the impossibility of retaining a trained staff and of obtaining a permanent group of employees. Our graduate nurse staff has diminished, as well as our group of other trained workers.

The student nurse program continues as before, except that the length of each student's stay in the clinics has been reduced. This has not interfered with the program as a whole.

RECOMMENDATIONS

There is still a much felt need for shelters at the clinic entrance for waiting patients.

APPRECIATION

In conclusion, we wish to express appreciation to the Board of Administrators, to the Director, and to the Admitting and Medical Staffs for their services and cooperation.

Respectfully submitted,

SISTER IGNATIA, R. N., Director,
Out-Patient Department.

STATISTICS FOR THE OUT-PATIENT DEPARTMENT
For Fiscal Year 1942-1943

Submitted by: SISTER IGNATIA, R.N.,

REPORT OF DIETARY DEPARTMENT

To the Board of Administrators and
Doctor O. P. Daly, Director
Charity Hospital of Louisiana at New Orleans

Gentlemen:

The Annual Report of the Dietary Department for the fiscal year beginning July 1, 1942 and ending June 30, 1943, is herewith respectfully submitted.

The Dietary Department has, as have all other departments, been contending with war conditions this year, and has had considerable difficulty in maintaining previously established standards.

Three major changes were made in the physical set up of the Department. The Director's Office was moved into the Special Dining Room, to make possible the enlargement of the White Visitors' Food Service. The Colored Dining Room was set up with temporary cafeteria arrangements in what was formerly the Purchasing Department. The Dining Room in the Nurses' Home was re-opened in March, 1943, in order to accommodate the new class of Student Nurses and relieve the congestion in the Main Building Dining Room. One additional cook and twelve other workers were approved by the Board for the operation of this Dining Room and Kitchen. All of these changes have proved satisfactory.

Through the help of the Engineering Department, ventilation of the Floor Pantries has been improved considerably by the construction of wall vents into the corridors.

The Dietary Department served 1,178,733 meals to Personnel and 1,845,075 meals to Patients, making a total of 3,023,808 meals served. Of this total 519,381 were special diets, such as allergy, bland, low residue, diabetic, etcetera. In addition to these special diets, 281,458 bottles and 5,508 quarts of special formulae were prepared in the Formula Room.

For the coming year the Department anticipates further progress and makes the following recommendations:

Definite plans are being made to begin the Course for Student Dietitians. The first class will be accepted in February, 1944, if possible, otherwise, in June, 1944. The Course is to meet in all respects the standards of the American Dietetic Association. Some changes in the Department, and some additional equipment and books will be requested in order to properly conduct this Course.

A Central Food Clinic is badly needed in the Out-Patient Department. The Dietary Department requests that a room be prepared for use as a permanent Food Clinic. Much confusion can then be avoided for both Staff and Patients.

The Department requests permission to study and purchase food conveyors which will permit the service of hot trays from the Diet Kitchen. Our present carts are open, and do not prevent trays from cooling before they reach the wards.

We are grateful to our Director and to the Board of Administrators for their interest and assistance this past year, especially for the increases in salary granted our employees, which enabled us to retain the services of loyal and valuable workers. Gratitude is also extended to the Sisters, Doctors, Nurses, and to the Staffs of all Departments for their cooperation, interest, and support.

Respectfully submitted,

SISTER EUPHEMIA,
Director, Dietary Department

To the Board of Administrators and
Doctor Oliver P. Daly, Superintendent
Charity Hospital of Louisiana at New Orleans,

Gentlemen:

The Annual Report of the Housekeeping Department for the fiscal year beginning July 1, 1942 and ending June 30, 1943 is herewith submitted.

This Department has labored under difficulties during the past year because of the constant replacement of personnel, due to the war. Forty-one positions formerly occupied by men are now being filled by women. A large turnover has also been experienced because of inadequate salaries, but raises for the employees have now been approved and will become effective on July 1. We are grateful for this salary adjustment.

A convenient location has been arranged for the Housekeeping Supply Room which provides ample space for storage of Housekeeping equipment.

New mattresses are very badly needed, and we are happy to report that approval has been granted to our request to purchase 1000 adult bed mattresses and 138 crib mattresses. All old moss mattresses in the Main Hospital section, Isolation Unit, and Colored Tuberculosis Building will be replaced with cotton layer felt mattresses.

The Salvage Division, which was opened a year ago, has continued to operate successfully and \$3,940.00 worth of material was sold from this Division during the past year. Besides helping the War Department in the collection of salvage, we feel that this project has made employees of the Hospital conscious of saving to eliminate waste.

LINEN AND SEWING SECTION

During the past year the Central Linen Section has been assigned to a new location, a large section of the White Clinic Record Room, which provides adequate space for the work of this division. A linen store room has also been provided from a section of the Morgue store room in the basement.

Though there has been some difficulty in procuring sheeting in sufficient quantity, a fairly adequate supply of linen has been maintained.

APPRECIATION

We wish to express our sincere appreciation to the Director and to his Administrative Staff, and to the Board of Directors for the generous assistance they have given the Housekeeping Department and the Linen and Sewing Section during the past year. We gratefully acknowledge also the interest and cooperation we have received from all Department Heads.

Respectfully submitted,

SISTER CLARISSE,

Director, Housekeeping Department

REPORT OF THE SOCIAL SERVICE DEPARTMENT

7/1/42 through 6/30/43

STAFF

In July, 1942 because of the financial crisis the number of employees in the Social Service Department had to be reduced by one-third. Although subsequently it was possible to continue the employment of some technical employees, the staff was reduced from 51 to 39. In November, 1942 when the Board of Administrators set up the number of positions in the hospital, the Social Service Department was allowed 41 employees.

1	Medical Social Worker IV
4	Medical Social Worker II
22	Medical Social Worker I
5	Hospital Intake Interviewer
2	Stenographer-Clerk II
3	Stenographer-Clerk I
1	Typist-Clerk II
2	Typist-Clerk I
1	Chauffeur

As a result of the increasing demand for medical social workers in connection with the war program and the high salaries paid stenographers in government work, turnover was rapid. During the fiscal year 34 workers resigned or requested leave mainly for war connected reasons while 30 replacements were made. On the average the department functioned with four vacancies in the medical social work staff, two vacancies in the Hospital Intake Unit and two to three vacancies in the clerical staff.

SALARY

Dissatisfaction over salaries has always been prevalent in the department. Although during the fiscal year July, 1941 to July, 1942 it was possible to put into effect the policy that all new employees who had completed two years in an approved school of social work were paid \$125 a month, dissatisfaction continued. When Civil Service became effective all new workers regardless of training or experience were paid the minimum salary of \$125 a month. This meant that workers who had completed the basic year were paid the same salary as those who had had two years' training as well as those who had had one or two years' training plus one or more year's experience. It meant also that workers with one year's training who had been making less than workers with two years training were raised to \$125 a month. With the increasing demand for medical social workers it was impossible to employ only workers with two years' training and specialization in medical social work. From the point of view of the workers this made further salary discrepancies in the department. Civil Service, however, considered that on the basis of equal pay for equal work, workers who did the same type of work should receive the same pay regardless of training or experience and that differences in individual performance as a result of training and experience should not be considered.

Besides the inequality in salaries the workers had been concerned over the lack of regular raises in pay. The staff as a whole believed that this operated to the detriment of the department and believed that unless this situation was corrected there would be a general exodus of workers. An attempt was made to explain the efforts which had been made to equalize salaries both by the department and by the state as well as to explain the difficulty of assuring definite and regular salary raises in a hospital operated by state appropriations.

WORK OF DEPARTMENT

The department has two functions: To provide case work services to patients under treatment and to determine eligibility of applicants for free medical care.

Case Work Services

Case work services are available to any patient under treatment in Charity Hospital wards, clinics, accident department and admitting department. To provide coverage for the entire hospital the work is divided as follows:

- One Supervisor: Colored Tuberculosis—One Worker
 While Tuberculosis (Tulane)—One worker
 White Tuberculosis (L.S.U.)—One worker
 Diabetic Service—One worker
 Tumor Service—One worker
 Female Surgery and GYN—One worker
 Male Surgery—One worker
- One Supervisor: Colored Orthopedic—One worker
 White Orthopedic—One worker
- One Supervisor: Male Medicine and Dermatology—One worker
 Female Medicine and Dermatology—One worker
 Neurological—One worker
 White Eye and E.N.T.—One worker
 Colored Eye and E.N.T.—One worker
 Obstetrics—One worker
 White Pediatrics—One worker
 Colored Pediatrics—One worker
- One Supervisor: Admitting and Accident Rooms—One worker
 Clinics—One worker

When resignations occur and replacements cannot be made immediately it is necessary for workers to handle more than one service assignment.

The workers are responsible to four supervisors. Eight services are assigned to one supervisor for supervision, while seven are assigned to another. One supervisor is responsible for the two workers on the Orthopedic Service, case work services to employees, plus the responsibility for the volunteer program. One supervisor is responsible for the supervision of social workers in the Admitting Department and general clinics plus the program of the Hospital Intake Unit. Although the establishment list calls for a fifth supervisor, the budget has not allowed for the salary of this supervisor.

During the year the workers handled 30,026 cases. The following shows the work of the department by months:

July, 1942	2,596
August, 1942	2,228
September, 1942	2,640
October, 1942	2,639
November, 1942	2,435
December, 1942	2,520
January, 1943	2,536
February, 1943	2,438
March, 1943	2,590
April, 1943	2,409
May, 1943	2,764
June, 1943	2,231
TOTAL	30,026

This total does not include all of the services rendered patients by the department for no attempt is made to keep a statistical count of all services given. For example, no count is kept of letters of inquiry about patients who have not received treatment within the last month which are handled by the director and supervisors; nor is any statistical count made of appliances secured for which the patient pays. The drop in the number of cases handled in 1942-1943 and 1941-1942 is explained by the fact that the clinics were closed for one month during the summer of 1942; the admissions to the hospital were restricted during the entire summer; the Salvarsan Clinic which provided one of the largest caseloads in the department was not functioning during the year. Furthermore a worker responsible for two services instead of one cannot care for as many patients as two workers can. Throughout the year it was necessary frequently for one worker to handle two services or for a supervisor to handle the work of workers who were ill or who had resigned.

SOCIAL ADMITTING

The Hospital Intake Unit has operated on its present basis for one year. During this period analyses of the percentage of abuse in the clinic and accident department have been made with interesting results.

When the clinics were reopened on 7/20/42, the Hospital Intake Unit was asked to determine eligibility of all patients referred to the clinic because the hospital administration believed that there were many clinic patients able to pay for private care. With the new procedure of having all applicants for clinic care referred by the admitting department there was the possibility, as there has never been before, to survey all patients under care. Prior to this on 6/30/42 when the clinics were closed, the Hospital Intake Unit had assumed responsibility not only for determining eligibility of patients admitted to the ward but also for patients requesting treatment in the accident department. Because of this and in view of the small staff as well as because so many patients were referred to the clinic for treatment, it proved impossible for the interviewers to determine eligibility of the patients referred from the admitting department for clinic care that same day. The interviewers, however, did talk with all patients who were given future clinic appointments. It is believed that in this way the bulk of the patients referred to the clinic were interviewed. In all 4,832 clinic patients were interviewed. Of these seventy-four were considered ineligible for free treatment. Six of the seventy-four were colored while sixty-eight were white. On the basis of these findings one hundred per cent interviewing of patients referred to clinic was not considered indicated. Determination of eligibility for free care of clinic patients therefore should be handled on the same selective basis as the wards.

On 12/1/42 because it had not been possible to make the necessary replacements in the Hospital Intake Unit staff, it was decided to limit the work of the unit until a full staff was available. It was considered no longer possible for the so-called questionable cases to be investigated. These questionable cases include all patients who are admitted to the ward or clinic whose income is not given or whose income is inconsistent with the occupation listed. This meant that the interviewers discontinued discussion of finances with patients coming under this classification. Furthermore, it was agreed that the interviewers would not interview patients who had a surplus of \$10 or less over the scale, since so small a surplus would rarely be sufficient to cover the cost of ward care. Effective 12/1/42, therefore, the Hospital Intake Unit was responsible for these types of cases:

1. All white patients seen in the Accident Room during the regular working hours. In addition, colored Accident Room cases were to be handled on a selective basis.
2. All clinic patients referred by the clinic typists whose incomes were above the scale.
3. All ward patients whose incomes as stated on the admission sheet was more than ten dollars above the scale.

4. Non-residents.
5. Possible liability and compensation cases.
6. Patients who might be eligible for treatment elsewhere.
7. Patients referred for investigation by hospital personnel or other interested individuals.

During February, 1943 because of overcrowding in the obstetrical clinic particularly as far as colored patients were concerned, and because the hospital administration believed that improved employment opportunities for Negroes should make it possible for some of the patients attending the obstetrical clinic to secure private medical care, Dr. Daly requested that eligibility of all patients attending the obstetrical clinic be determined. Therefore, one of the Hospital Intake Interviewers was assigned to the obstetrical clinic for the period 3/1/43-4/1/43. Although it was realized that one worker could not interview all of the patients attending this clinic, since they averaged between 200 and 300 a day, it was believed that if this worker interviewed as many patients as she could during the four weeks period, the findings would give some indication as to whether or not there was abuse of the clinic by patients able to pay. During the period 3/1/43-4/7/43 which consisted of 32 clinic days, Mrs. Elizabeth Schnap, Hospital Intake Interviewer, assigned to the obstetrical clinic, interviewed 532 patients. The findings were as follows:

	White	Colored	Total
Number of Patients Interviewed	154	378	532
Eligible	144	376	520
Ineligible	10	2	12
Per Cent of Patients found to be Ineligible	6 1/2%	1/2 of 1%	2 3/10%

As only 12 patients were found able to pay for private care, the size of the clinic was not reduced appreciably. This figure did not include any patients in the last months of pregnancy who were found able to pay for private care, as it was agreed that such patients would not be transferred because of difficulty in arranging private care at that stage of pregnancy. As so few patients were found ineligible for treatment, the hospital administration agreed that eligibility in the obstetrical clinic should be determined on a selective basis as it was in all other clinics.

In May, 1943 the Director of the hospital requested a report analyzing the work of the Hospital Intake Unit in the Accident Department. It seemed that the Board of Administrators thought that collections from ineligible patients were not as high as they should be; that very possibly collections from patients treated in the Accident Department could be increased. Because ineligible patients are found under treatment in the ward, clinics and accident room, the Hospital Intake Unit interviewers have been spread over these three services, rather than concentrated in any one. But since the number of ineligible white patients treated in the Accident Department was found to be large, a worker had been stationed in the Accident Department since the summer of 1942. During April, 1943 the interviewer stationed in the White Accident Department interviewed 417 patients. There were 2034 patients treated in the White Accident Department during this period. Of these 2034 patients treated, 1617 patients were not interviewed. Of the 2034 patients treated, 670 were treated during administrative hours; of these, 253 were not interviewed. It was not possible for the worker to interview all of the patients who were treated in the Accident Department during administrative hours because of the various processes involved in determining eligibility for free medical care such as telephone calls to insurance companies, private doctors, employers, private hospitals, etc. Of the 417 patients interviewed 303 were eligible for free medical care and 114 were ineligible. Therefore of the number interviewed 27+ % were ineligible. On the basis of this percentage it is estimated that during April there were about 550 patients treated in the Accident Department who were ineligible.

for free medical care. Most of these patients, however, were treated outside of administrative hours. It was thought that an additional person in the Accident Department during administrative hours could interview not only all of the white patients treated between 8:30 and 4:30 but also on a selective basis determine the eligibility of about 200 of the patients treated outside of administrative hours. However, because the percentage of ineligible patients found on the ward during April was 23% and in the clinic 59% (the latter percentage is high for few patients were interviewed), it was not believed that it would be a good idea to reduce interviewing patients in the wards or clinics in order to have additional staff in the Accident Department. But for the period 5/13/43 to 6/30/43, on an experimental basis, one of the Hospital Intake Interviewers was utilized to interview patients who were treated in the colored Accident Department in an attempt to determine what the percentage of abuse is among these patients. From the table below it will be noted that of the number of Negro patients interviewed in the Accident Department during the six weeks' period 9% were found able to pay for private care. This figure is much smaller than the percentage of ineligible white patients interviewed in the Accident Department during April, 1943: 9% as compared to 27+%. But in view of the fact that the worker assigned to the colored Accident Department was inexperienced, it is considered advisable to continue the interviewing of Negro patients for some time longer before making definite comparisons and deductions as to the percentage of ineligible patients.

STATISTICAL ANALYSIS DETERMINATION OF ELIGIBILITY IN COLORED ACCIDENT ROOM FOR SIX WEEKS PERIOD (5/13/43-6/30/43)

Total number of patients treated	3604
During Administrative Hours	1450
Outside of Administrative Hours	2154
Total number of patients interviewed	959
Eligible	871
Ineligible	89 (9%)
Total number of patients treated, but not interviewed (this includes a fairly large percentage of repeat visits, in which the patient would not be interviewed again)	2643
During Administrative Hours	491
Outside of Administrative Hours	2152

Because the business office considered that one reason why collections were not larger was the delay in getting bills out, a committee was appointed by the Director of the hospital to make recommendations to facilitate billing of ineligible patients, compensation and liability cases. The committee believed that the delay in billing was caused by:

1. Failure of the doctors to complete charts rapidly.
2. Delay in receiving x-ray and laboratory reports. Until these reports are received, it is impossible to make out bills, which, although the kind of laboratory tests or x-rays ordered may be listed, there is no way to verify whether or not the work was actually done except by the report.
3. By delay in receiving notification from the Hospital Intake Unit that the patient is able to pay for private care. Some delay is unavoidable since a decision often pends until treatment has been outlined. As a convenience to the Treasurer's office, notification is not sent until the patient is discharged. However, in some instances a decision has not been made at the time of discharge because of difficulty encountered in verifying income.

To facilitate billing, the committee made the following recommendations:

1. The Hospital Intake Unit stamp the records of all ineligible patients with the words "Attention Treasurer's Office" in the upper right hand margin of the master sheet as soon as a decision in regard to eligibility is made. Compensation and liability cases also will be stamped with this notation.
2. That charts so stamped will be put aside by the Record Library for daily review by the Compensation Clerk.
3. That the Director of the hospital request the intern and resident staff to complete charts bearing this stamp as rapidly as possible. This request is now in effect and interns and residents are urged to complete these charts at the earliest possible time.
4. That the Director of the hospital request the X-ray and Pathology Departments to complete the reports on these cases as soon as possible. These departments will be notified by compensation clerk when reports are lacking. This request is also in effect.
5. That the Social Service Department will continue to notify the Treasurer's Office by form letter of all ineligible patients as soon after discharge as possible. If the patient has died, this will be noted on form letter so that compensation clerk can check record in morgue.
6. That if any patient whose chart is stamped with notation "Attention Treasurer's Office" reports to clinic, the Hospital Intake Unit will be notified.

This procedure has been in effect since June, 1943 but it is too soon to determine whether or not it is helpful.

The table on the following page shows the work of the Hospital Intake Unit by months.

STUDENT TRAINING PROGRAM

During the summer semester, July-August, 1942, eight students received field work placements at Charity Hospital while during the fall semester there were thirteen students and seventeen students were assigned for the spring semester. During the summer and fall semesters the Tulane School of Social Work, as it had in the past, provided field work instructors to be stationed at the hospital to supervise the student work. In the spring, however, the two field work instructors from the School could not handle seventeen students, therefore one member of the supervisory staff of the department and two of the case workers were selected by the School to serve as student supervisors. This was the first time that the School had agreed to use members of the case work staff for the supervision of students. In the past it had been the policy of the School as far as medical agencies were concerned to accept supervisors only for this assignment. It was considered that the agreement entered into during the spring semester had established a precedent and that it would be possible from this time forward to have workers participate in the supervision of students whenever the registration became too large for the field work instructors supplied by the School. This meant growth experience for the workers in the department and it offered an incentive to the staff because of the prestige as well as the experience attached to being a student supervisor. As the department had been able to offer little hope of advancement in salary or advancement into supervisory positions, it was believed that the possibility of the workers being used as student supervisors would serve as a stimulating factor to the staff.

Besides this program the department continued to participate in the educational program of the Charity Hospital School of Nursing; one member of the supervisory staff is responsible for teaching several courses.

There has been participation also in the teaching of medical students in the preventive medicine courses at the Tulane University School of Medicine as well as some special classes at L. S. U.

SUPERVISORY PROGRAM

Because of lack of funds it was not possible to develop the supervisory program as outlined in the previous annual report and it continues to be necessary for the supervisors to serve in dual capacity, that is, to insure that the workers followed routine office policy and to act as consultants on questions of case work procedure. It was possible, however, to work out an evaluation program.

Month	Total Number of Patients Interviewed		Total Number of Patients Eligible		Total Number of Patients Ineligible	
	White	Colored	White	Colored	White	Colored
July, 1942	243	273	201	268	42	5
August, 1942	1,625	3,653	1,444	3,638	181	15
September, 1942	1,507	3,233	1,311	3,188	196	45
October, 1942	520	181	396	161	124	20

May, 1943	770	466	552	418	218	48
June, 1943	788	761	578	677	210	84
TOTAL	9,256	9,792	7,265	9,366	1,991	426

During the past year a member of the supervisory staff, Mrs. Enolia Archinard, has been working on an outline to be used in the evaluation of workers in the department. In order to do this it was necessary to try to determine the skills which the beginning worker had when she left the school, the skills which she should have developed at the end of a twelve months' period in a medical social agency. In order to develop such an outline, the entire supervisory staff including Mrs. Helen Feild who has been on leave, read all written material available on evaluations. Material, however, is available on non-medical agencies only. There has been no published material by medical social agencies. After the material was read and discussed, Mrs. Archinard developed the outline on the basis of her experience in the supervision of about eight first year workers. The evaluation outline has been developed for the use of all workers in the department. Mrs. Archinard, however, developed a norm which applies to workers at the end of one year only. Workers in the department from now on will be evaluated on 1) Competence in case work practice, 2) Skill in work organization, 3) Ability to maintain professional relationships, 4) Use of supervision, 5) Acceptance of professional responsibility. During the coming year it is planned to evaluate all workers according to the outline and as workers complete one year in the department they will be evaluated according to the norm developed by Mrs. Archinard. It is thought that at the end of another year the department will have material which should be ready for publication. The American Association of Medical Social Workers, meanwhile, has started a committee to work on this subject. At the present time the work of this committee is confined to only one hospital. The department has asked the chairman of the committee to include other hospitals in the study and that the Social Service Department at Charity be one of the participating hospitals.

EXPENDITURES

The table which follows shows in detail the disbursements of the Social Service Department for transportation, board, medication, appliances, etc., for the fiscal year:

Patients' Fund (This includes money spent by patients and agencies)	\$1,763.37
Paid by Social Service Department	
Transportation: Patients	155.98
Transportation: Employees (Carfare for students or volunteer workers)	47.90
Sundry	273.98

Patients Fund—Paid by Patients and Agencies

Transportation: Paid by Agencies	135.71	
Paid by Patients	1,119.99	
Sundry:		
Amounts due—Paid by Patients	254.39	
Amounts due—Paid by Agencies	35.09	
Rx—Paid by Patients	24.56	
Rx—Paid by Agencies	81.12	
Room and Board—Paid by Agencies	26.60	
Food—Paid by Agencies	1.73	
Appliances—Paid by Patients	65.12	
Incidentals—Paid by Agencies	2.00	
Shoes and Repairs—Paid by Patients and Agencies	12.06	\$1,763.37

Paid by Social Service Department

Transportation: Patients	\$ 155.98	
Employees	47.90	203.88
Sundry:		
Taxi for Patients	8.85	
Telegrams	23.51	
Rx	49.05	
Appliances	19.24	
Postage40	
Office Supplies	4.07	
Stamps	25.00	
Call refunded to DPW71	
Amounts advanced Patients	9.95	
Subscriptions, books and dues	13.99	
Government post cards	7.00	
Room and Board	55.46	
Shoes and Repairs	9.62	
Food	15.58	
Car Tokens	30.00	
Incidentals	1.55	273.98

\$2,241.23**Reimbursements to the Social Service Department**

Some of the money expended by the Social Service Department was repaid. During the year the total amount repaid was \$393.98. During the fiscal year, therefore, the average disbursement by the department was \$6.99 a month.

Car Tokens

The following table shows the number of car tokens given to patients during the fiscal year, 1942-1943.

Month	No. of Patients	No. of Tokens
July, 1942	15	23
August, 1942	20	42
September, 1942	31	57
October, 1942	21	37
November, 1942	34	72
December, 1942	25	54
January, 1943	25	38
February, 1943	23	49
March, 1943	20	58
April, 1943	15	43
May, 1943	8	22
June, 1943	8	16
Total		512
		\$35.84

During the calendar year, January, 1940 to January, 1941, the Social Service Department spent approximately \$500 for 7,263 car checks. During the fiscal year, July, 1941 through June, 1942, 6,064 car checks were used, or a total of \$424 spent. During the past fiscal year, July, 1942 through June, 1943, 512 car checks were used, or a total of \$35.84 spent. The decrease is marked.

Note: Under expenditures it will be noted that \$30.00 was disbursed for car checks. The additional \$5.84 worth of car checks had been purchased during the previous fiscal year but had not been used.

Gauze

By supplying gauze and adhesive for dressings and by arranging for nursing service from the City Department of Health, it is often possible to discharge patients from the hospital earlier than would otherwise be feasible. This enables the hospital to begin treatment of another patient. In the same way it is possible also to keep patients from returning to the clinic several times a week for dressings. There are some conditions such as colostomies, esophageal strictures, etc., which need dressings over an indefinite period. As the cost of such dressings bought through drug stores is prohibitive and in view of the advantages from the point of view of the hospital of relieving the wards and clinics, gauze and adhesive for dressings for out-patients has been supplied by the hospital for several years.

The following table shows the amount of gauze, adhesive and bandage given to patients during the fiscal year:

Month	Number of Patients	Amount of Gauze	Amount of Adhesive	Amount of Bandage
July, 1942	7	53	0	0
August, 1942	6	51	5	7
September, 1942	12	78	24	30
October, 1942	6	60	5	7
November, 1942	6	51	4	3
December, 1942	10	61	11	18
January, 1943	3	8	0	4
February, 1943	4	18	1	0
March, 1943	5	35	2	0
April, 1943	8	83	0	2
May, 1943	5	50	0	9
June, 1943	3	25	0	2

During the calendar year, January, 1941 to January, 1942, 17,357 packages of gauze, 1,307 rolls of bandage and 694 rolls of adhesive were given out to patients; while during the fiscal year, July, 1941 through June, 1942, 12,634

packages of gauze, 1,798 rolls of adhesive and 1,065 rolls of bandages were dispensed. During the fiscal year, July 1942 through June 1943, 573 packages of gauze, 52 rolls of adhesive and 82 rolls of bandages were given out.

Besides car checks there has been a noticeable decrease in the amount of dressings supplied. It is not believed that this more careful use of dressings and car checks has caused any patients hardships.

FUNDS

Poliomyelitis Fund

There have been no disbursements from the Poliomyelitis Fund during the fiscal year.

Special Fund

Due to a misunderstanding in regard to the use of forms for the Special Fund although the department requested expenditure of the Fund, these expenditures were not charged against the Special Fund but against the operating expenses of the department. In May, 1943, however, procedure was clarified and instructions in regard to the special forms to be used were circulated. At this time because of the fact that there were increasing demands for appliances for individuals who did not meet the requirements of the Poliomyelitis Fund or funds for crippled children requests amounting to \$14.77 for the use of the Special Fund for such appliance were made. Mr. Fred W. Matthews, Secretary-Treasurer, was asked to determine whether or not permission to use the fund in this way should be rediscussed with the board. The point as yet has not been cleared up but requests for appliance have been approved by the Secretary-Treasurer's office. In one instance the Fund was used to provide false teeth for a 14 year old white boy who was hospitalized in Dibert for treatment of advanced adult type of tuberculosis and diabetes. On another occasion the Fund was used to provide a 33 year old colored woman who was unable to work with a colostomy bag. Although she had been referred to an agency for public assistance, funds for a grant were not yet available. Without the colostomy bag the patient would have been unable to have contacts with other people. The amount on hand in the Special Fund as of June 30, 1943 was \$517.92.

Insulin Fund

Insulin purchased during period 7/1/42-6/30/43	\$ 499.82
Patients served	351
Original Fund	500.00
New Fund, December, 1941	500.00
New Fund, October, 1942	500.00
Total Fund	\$1,500.00
Total Expenditures	1,043.60
Cash Balance as of 6/30/43	\$ 456.40

Of the 351 patients served by the Fund, 266 were able to make arrangements to secure insulin after the initial grant, but 85 had to be given additional help through the Insulin Fund. In most of the latter instances the patient had been certified for a public assistance grant but funds to institute the grant were not available. These patients, therefore, were provided with insulin until a relief grant was obtained.

During the three summer months of July, August and September, 1942 insulin was purchased for 102 patients, that is, a fraction less than one-third of the total number of patients (351) served during the whole fiscal year. This was due to the relief crisis in the Department of Public Welfare when patients who fell under the category of the Others Assistance group were dropped from the agency's rolls and the bulk of the diabetic patients were included in this category. Even

when the Department of Public Welfare were able to reinstate some of these patients, the number of patients serviced by the Insulin Fund continued to increase from October, 1942 through January, 1943 because of limited public relief appropriations. For the three months from February, 1943 to April, 1943 the number of patients served dropped to 52 because the Department of Public Welfare had received an increase in relief funds and were able to assist a correspondingly larger number of patients, while in May, 1943 the amount expended for insulin arose as the funds available to the Department of Public Welfare for the Others Assistance group had been exhausted. The Insulin Fund expenditures, therefore, vary in proportion to the amount available to the Department of Public Welfare for relief expenditures, especially for those cases that fall into the Others Assistance group.

However, another factor should be considered as accounting in part for Insulin Fund expenditures, namely, the proportion of new diabetic patients on the wards. As the patient is unaware of his diagnosis and is usually not equipped financially to buy the syringe, needles, and initial supply of insulin, it is usually necessary to use the Insulin Fund to give him the insulin equipment and medication. This is done to facilitate turnover on the wards. To secure funds from other sources would mean hospitalization for perhaps seven to ten days longer.

Weil Convalescent Fund

The department was notified about the Weil Convalescent Fund in January, 1943. The Emanuel Leopold Weil and Clarice Homer Weil Convalescent Fund was given to Charity Hospital of Louisiana at New Orleans in 1938 by Mr. Emanuel L. Weil for the use of needy convalescents. The Fund amounts to \$150 a month and will terminate in approximately ten to fifteen years.

The Fund which can be given in amounts not exceeding \$10 or under \$5 is dispensed only on the approval of a committee of three. Dr. O. P. Daly, Director of Charity Hospital, Mr. Fred W. Matthews, Secretary-Treasurer, and Sister Henrietta, Director of the School of Nursing. Summaries are being kept on all patients referred by the Social Service Department so that it will be possible for the department to know the numbers and types of cases for which the use of this Fund is requested. Through June, 1943 the Fund had been obtained for seven patients.

Social Justice Fund

During November and December, 1942, the Social Service Department was given a total of \$20 from the Social Justice Fund of Temple Sinai. Of this money which was used for eight patients, \$15.98 provided food or shelter for five patients, \$3.27 provided appliances for two patients while 75c was used for medication for one patient.

WORK OF CHAUFFEUR

Although books in which requests for use of the car have been kept since October, 1929, there has been no regular statistical computation of the work of the chauffeur. Beginning January 1, 1943, it was decided to keep track of his work in the following manner:

Trips Made By Chauffeur	Jan.	Feb.	Mar.	Apr.	May	Jun
Social Agencies	9	25	12	11	12	11
Institutions, N.O.C.H., Shelter Homes	40	52	40	25	38	34
Post Office	5	8	5	6	9	10
Patients' Homes in New Orleans	50	95	70	82	82	101
Drug Houses	29	27	21	21	20	21
Coroner's Office	3	3	1	2	4	4
Railroad Stations	36	30	52	50	44	31
Bus Stations	14	17	29	25	31	21
City Ticket Offices	1	7	0	1	8	8
New Orleans Public Service	1	0	1	1	0	0
Social Workers to Patients Homes	0	3	0	3	11	10
Social Workers to Social Agencies	9	14	14	6	5	7

TOTAL	227	303	264	251	279	290

TUBERCULOSIS STUDY**TUBERCULOSIS STATISTICAL REPORT FOR YEAR**

6/15 42 to 7 1/43

Color	Number of Patients	Reason For Remaining On Ward		Lack of Custodian Care	
		Lack of DPW Funds Boarding Care Days	Cost	Lack of Custodian Care Boarding Care Days	Cost
Colored	60	112	\$ 313.76	1,130	\$ 2,620.60
White	235	2,837	6,870.44	3,356	8,139.20
Total	295	2,949	\$7,184.20	4,486	\$10,759.80

Note: Amount of estimated cost per diem for care of patient was \$3.38 from June 15, 1942 to September 1, 1942; estimated cost after September 1, 1942 was \$2.11.

Of the total of 295 patients (60 colored and 235 white), 12 patients (11 white and 1 colored) died and plans were made for discharge of 38 patients (31 white and 7 colored). Difference in numbers between colored and white patients for whom it was possible to make plans for care outside of hospital is explained in part by complete absence of facilities in the city and state for sanitarium care of boarding care of the chronically ill colored tuberculosis patient.

VOLUNTEERS**American Red Cross**

A new group of Gray Ladies was inducted during the last quarter of the fiscal year. This was an additional group of 31 workers to be assigned throughout the hospital.

In the Social Service Department the Gray Ladies were responsible for handling the intake desk, and for assisting with the filing in the main office as well as the Hospital Intake Unit, and for functioning as an aide on the orthopedic and diabetic services. In other departments of the hospital, Gray Ladies were assigned to the Orleans Parish School Board teacher, to Central Service, Nursing Service and the Pharmacy.

Staff Assistants—Throughout the year a staff assistant reported regularly three times a week to answer the telephone.

American Society for the Control of Cancer

When the operation of the Tumor Clinic was resumed in February, 1943, the Women's Field Army of the American Society for the Control of Cancer agreed to provide volunteers to be responsible for follow-up in that clinic, to function under the social worker in the Tumor Clinic.

American Women's Volunteer Service

American Women's Volunteer Service tried to arrange for one volunteer typist to report every day. If these volunteers had been able to report regularly, it was thought that this would have greatly reduced the problem of getting out stenographic work. As they either became ill or went on vacations or their husbands were transferred elsewhere, the group was transitory and personnel was constantly being changed.

At Large

Throughout the year there have been several dependable and efficient individuals both trained in social work and untrained who have volunteered but who have not been connected with any of the volunteer organizations.

Other individuals in the community both white and Negro have been of great service by making funds available to different white and Negro families who are in dire situations, pending the institution of a relief grant.

Orientation Courses

The department has participated in the orientation courses given the Junior League, Office of Civilian Defense, and Navy Relief Society volunteers.

NATIONAL CONFERENCE OF SOCIAL WORK

The director participated in the program of the National Conference of Social Work. This consisted of a panel discussion on the Social Treatment of the Prostitute.

Respectfully submitted,

LOUISE MEYER.

Director Medical Social Service Department.

REPORT OF THE DEPARTMENT OF PATHOLOGY

July 1, 1942 to July 1, 1943

CHARITY HOSPITAL OF LOUISIANA AT NEW ORLEANS

DIAGNOSTIC LABORATORIES

Serology	67.42
Biochemistry	40.45
Bacteriology and Central Laboratory (for Contagious Unit)	22.68
Central Laboratory for Tuberculosis (Unit)	7.38
Hematology	10.17
Parasitology	10.62
Out-Patient Clinic Laboratory (white and colored)	51.52
Emergency Laboratory	45.31
Blood typing and matching	35.68
Venereal Diagnostic Laboratory	1.69
Basal Metabolic Laboratory	1.20
Friedman	14
	294.19

SURGICAL PATHOLOGY

Surgical specimens received	6,416
Autopsies sectioned	826
Histopathological specimens completed	39,398

PATHOLOGIC ANATOMY

Total deaths	2,462
Coroner's cases	850
Autopsies on Coroner's cases	151—17.7%
Bodies (unclaimed) delivered to Anatomy	57
Bodies delivered to museum	4
Bodies available for autopsy	1,702
Total number autopsies	836—49.0%

PASTEUR INSTITUTE

Total number animal brains examined for rabies	213
Negative	133
Positive	80—37.0%
Patients received in Pasteur Clinic	1,431
Treated	330
Observation	1,101
Average number of patients treated per day	22
Total number of injections of anti-rabies vaccine administered	6,532

Two deaths from human rabies occurred in May, 1943. The incidence of rabies in animals has shown a steady increase throughout the year.

SCHOOL OF MEDICAL TECHNOLOGY

Number of students in training	12
Number of students completing training	4
Number of special students receiving training in Parasitology	17

MORGUE

Number of burials prepared		104
Number of trips to wards for purpose of conveying deceased bodies to Morgue		3,157
Use of Morgue Amphitheatre for teaching and conferences:		
	Hours	Sessions
Clinical Pathological Conferences	65	38
Pathological Conferences	290	260
Neuro-pathological Conferences	48	48
Tulane University classes	282	165
Louisiana State University classes	224	144

The total number of tests performed by the Diagnostic Laboratories shows a decrease from the totals reported for 1941-42.

The closing of the Salvarsan Clinic and one Out-Patient Clinic Laboratory on 7/1/42 is reflected in the decrease in the number of serological tests for syphilis. The closing of other laboratories for periods varying from one month to permanent closure is reflected in the general decrease. Totals for the second half of the year are more nearly comparable to totals for the previous years.

Services Interrupted	Services Discontinued	Services Resumed
White Out-Patient Clinic Laboratory	7/ 1/42	combined and re-opened on
Colored Out-Patient Clinic Laboratory	7/ 1/42	8/ 3/42
Veneral Diagnostic Laboratory	7/ 1/42	8/15/42
Emergency Laboratory	8/19 42	10/15/42
Basal Metabolic Laboratory	7/ 1/42	10/ 1/42

This interruption in service resulted from the threatened closure of Charity Hospital and subsequent loss of personnel.

OTHER ACTIVITY

1. A laboratory unit for the study of the diagnosis and treatment of enteric diseases was established by the United States Public Health Service under the direction of Dr. J. Watt, Surgeon. This unit uses the facilities of the Department of Pathology, Division of Bacteriology.

2. The Division of Serology participated in a state-wide survey on the standardization of serological tests for syphilis. The results of the survey were very gratifying in that the two tests (Kolmer and Kline) as performed at Charity Hospital are comparable in sensitivity and specificity to tests performed in the laboratories of the authors and originators of the respective tests.

STAFF

Medical Staff:

- Emma S. Moss, M. D., F.A.S.C.P., F.A.C.P., Director, certified American Board of Pathology: Pathologic Anatomy and Clinical Pathology
 Emil E. Palik, M. D., certified American Board of Pathology: Pathologic Anatomy

Secretarial and Clerical:

- | | |
|--|--|
| Margaret Carre, Secretary to Depart-
ment of Pathology and Clerical
Supervisor | Grace Jerez
Amelia Brinkman
Ella Dominguez |
| Rosalie Rogers, Secretary, Division
of Surgical Pathology | Sophie Halpen, Receiving Clerk
Hebert Frere, Morgue Clerk |
| Sadina Bertucci | |

Autopsy Assistants:

- | | |
|--------------------------------|-----------------|
| Estival Savoie, Heal Assistant | Robert Durbin |
| Albert Barousse | Gillis Bergeron |
| Freddie Kirsch | |
| Olivia Knowles | Frederick Minor |
| Fannie Thomas | Paul Alexis |

Custodial Workers:

There has been a tremendous turnover in all classes of personnel throughout the year. Several factors have been responsible for this:

1. Reduction of personnel by 30% on 7/1/42.
2. Personnel resigned during period of threatened closure of Charity Hospital.
3. Personnel inducted into Armed Forces.
4. Miscellaneous: illness, marriage, change of position.

Externes:

The shortage of both medical and technical personnel has been partly compensated for by the appointment of twenty externes to the Department of Pathology. Ten externes are appointed from each of the two Medical Schools (Tulane University and Louisiana State University). Appointments are made from the Junior and Senior classes. The duties are varied:

1. Night emergency laboratory and night necropsies.....	12 externes
2. Recording clerks—Sunday necropsies	4 externes
3. Cross index clerks—Saturday P. M. necropsies	2 externes
4. Central Laboratory for Tuberculosis Units	2 externes

Board, room and laundry are offered as compensation for the work performed by this group of personnel. In addition they receive most valuable training in Pathologic Anatomy and Clinical Pathology which should be of inestimable advantage to them in the future practice of medicine.

Respectfully submitted,

EMMA S. MOSS, M. D.,
Director, Department of Pathology

REPORT OF HEART STATION**July 1, 1942 to June 30, 1943**

Director

RICHARD ASHMAN, Ph. D.

Cardiologist

JAMES L. GOUAUX, M. D.

Cardiology Technicians

DOROTHY J. YORK, B. S.

ELIZABETH C. COATE, B. S.

ELISABETH D. ALLEE, B. S.

SHIRLEY A. GARROT, B. A.

Dr. O. P. Daly, Director, Charity Hospital,
New Orleans, Louisiana.

Dear Sirs:

We wish to submit our annual report of activities of the Heart Station at Charity Hospital.

The functions of the Heart Station, including recording electrocardiograms both with and without sound tracings, making fluoroscopic examinations of the heart and great vessels, recording Sphygmomanometer readings on patients with peripheral vascular diseases and doing sedimentation rate studies are represented in detail by the accompanying table.

During the past year there has been considerable interest shown by the Resident and Intern Staff in the work of the Heart Station. We feel that more advantage is being taken of what is offered in the way of diagnostic help in cardiovascular diseases.

We wish to thank the Director of the Hospital and the Board of Administrators for their excellent co-operation during the past year.

Respectfully submitted,

JAMES L. GOUAUX, M. D.,

Cardiologist, Charity Hospital

MRS. MARION B. STEWART, Ph. D., R.P.T.T.

Director

Dr. O. P. Daly, Director,
Charity Hospital of Louisiana.

Dear Sir:

The following is the report from the Department of Anesthesia for the year July 1, 1942 through June 30, 1943: During this year residencies were initiated in the department. The residents are physicians who have completed one year of internship in an approved hospital. They are appointed for periods of a year and their appointment is subject to renewal over a period of three years if their work is satisfactory. A training program conforming to the requirements of the American Board of Anesthesiology has been instituted. After completion of the three year training period, a resident will have had the requirements for certification as diplomate of this board.

Certain newer methods of anesthesia were introduced during the past year. Notably among these is the continuous caudal method of anesthesia for relief of pain in obstetrics. This method of anesthesia was demonstrated on many occasions to visiting physicians from outlying districts who were either interested in learning the technique or seeing it employed.

In general, the activities of the department have been as they have in the past. There has been a sharp reduction in personnel due to the scarcity of technicians. The department has been fortunate in that it has been able to rely upon individuals receiving instruction for the execution of its various functions.

The following is a tabulation of the types of anesthesia administered during the current year.

Ether	4,811
Nitrous Oxide	1,190
Ethylene	672
Cyclopropane	951
Spinal	1,662
Vinethene	95
Avertine	14
Intravenous	185
Local	2,016
Miscellaneous	1,195
Total	12,791

Sincerely yours,

JOHN ADRIANI, M. D., Director,
Department of Anesthesia.

REPORT OF KENNY UNIT

July 1, 1943

Poliomyelitis (Infantile Paralysis) has affected the inhabitants of Louisiana for a long period of time. In 1841 the first cases of poliomyelitis reported in North America occurred in West Feliciana Parish, where ten (10) cases were reported by Dr. George Colmer. The problem of relieving the victims and supplying the necessary hospital facilities has been a very perplexing one to the medical profession and public health authorities.

According to the official state crippled children's register of the Louisiana State Board of Health, Division of Crippled Children Services, eighteen and one-half percent ($18\frac{1}{2}\%$) of all crippling conditions are due to poliomyelitis. For the past twelve years there has been an average of eighty two (82) cases per year in this state, and the disease occurs in epidemic and endemic form.

Seeking a better method of procedure in the treatment of acute cases of poliomyelitis a debatable question was raised among medical authorities. However, the Kenny concept in treating early cases appears to offer the most logical basis. For this reason a plan was proposed whereby a scientific study of Sister Elizabeth Kenny's method could be undertaken, and as a result the Kenny Unit was established, jointly with the Charity Hospital of New Orleans and the Division of Crippled Children Services of the Louisiana State Board of Health in cooperation with the Louisiana State University School of Medicine, Tulane University Medical School, the independent services of Charity Hospital, and the Orleans Chapter of the National Foundation for Infantile Paralysis, Inc. It is considered an orthopedic-pediatric service where cases of acute infantile paralysis are treated according to the Kenny method. Patients admitted are treated under isolated conditions as employed in all infectious diseases.

On January 15, 1943, the Unit was officially opened with twenty-six (26) beds available. It is located in the old Female Medical Building on the grounds of Charity Hospital of New Orleans. There have been twenty (20) cases admitted up to June 30, 1943. Of this number seven (7) were diagnosed as not being frank cases of poliomyelitis, the remaining thirteen (13) cases were treated as either acute or subacute cases of poliomyelitis. The number of hospital days care provided for this group was seven hundred ninety-five (795), which averages sixty-three and one-half ($63\frac{1}{2}$) days care per patient, with one hundred sixty-six (166) days the longest period of hospitalization, and thirty-one (31) days the shortest. This Unit does not operate an out-patient department. However, all cases are admitted directly through the Charity Hospital. It is staffed by outstanding physicians, is scientifically equipped, and as a result it is possible to make an early diagnosis of acute poliomyelitis, an important factor in the treatment by the Kenny method, in order to obtain maximum benefit. The establishment of this Unit also offers a better facility for the study of the course of the disease as well as better methods of prevention.

September 24, 1943

B. J. Aymond, M. D.

REPORT OF LUNG STATION

July 1, 1943

The prospectus for the Lung Station was presented to the Board of Administrators on May 25, 1943, and unanimously approved.

The purpose of the Lung Station was explained to the members of the Board as follows:

Measurement of the various portions of the volume of the Lung, collectively and individually, have been proven of great value in determining the management of patients with pulmonary diseases. In order to make these measurements, apparatus costing about \$3,000.00 was purchased. With such equipment the lung volume may be accurately measured, as well as the composition of the expired air and gaseous content of the blood. This information will tell the physician the exact status of the lungs of patients under study and will enable him to predict the probable outcome of his disease, especially when surgical procedures are contemplated.

Space on the ground floor of the Colored Tuberculosis Building was chosen for the site of the Lung Station after great deliberation. It was completely renovated and electrical outlets, sterilizers, etc. were installed. Most of the apparatus did not arrive until after June 30th., nor was the department ready for operation before the end of the fiscal year.

Respectfully submitted,

J. S. LADUE, M. D., Director,
Lung Station.

REPORT OF DEPARTMENT OF ALLERGY

During the past year 108 cases were referred to our department from the various services for diagnosis and treatment. The total number treated notwithstanding the temporary closure of all the out-door departments, was 3,669 divided as follows: 1,689 White and 1,980 Colored.

Due to their improved finances many previously under treatment were transferred by the Social Service to private physicians. We continue to observe gratifying results with Stock Dust Vaccine in 40% of the perennial Asthmas. Though the Ragweed pollen count was higher than usual an additional 5% of the cases showed good control of their fall allergy.

My associate Dr. Henry Ogden reports that we have now available a very complete set of Allergens which have been used in the diagnosis of patients referred to us from various services.

Respectfully submitted,

NARCISSE F. THIBERGE, M. D.,
Chief of the Department of Allergy.

REPORT OF PHARMACIST

July 1, 1943

Dr. O. P. Daly, Director
Charity Hospital of Louisiana
New Orleans, La.

Dear Doctor Daly:

The following is the report of the Pharmacy Department for the year ending June 30, 1943:

Special Prescriptions filled	47,501
Narcotic Prescriptions filled	4,311
Stock Prescriptions filled	79,876
Total	131,688

SERUMS AND ANTITOXINS PURCHASED

Anti-Anthrax Serum 50 cc.....	10 Vials
Anti-Dysenteric	3 Vials
Anti-Influenza Type B Serum.....	47 Vials
Anti-Meningococc Serum	20 Vials
Anti-Pneumococc Serum—20,000 Units Type 1	25 Vials
Anti-Pneumococc Serum—50,000 Units Type 1	6 Vials
Anti-Pneumococc Serum—20,000 Units Type 3	70 Vials
Anti-Pneumococc Serum—20,000 Units Type 4	15 Vials
Anti-Pneumococc Serum—20,000 Units Type 5	10 Vials
Anti-Pneumococc Serum—20,000 Units Type 6	35 Vials
Anti-Pneumococc Serum—50,000 Units Type 7	6 Vials
Anti-Pneumococc Serum—20,000 Units Type 8	30 Vials
Anti-Pneumococc Serum—50,000 Units Type 8	12 Vials
Anti-Pneumococc Serum—20,000 Units Type 12	35 Vials
Anti-Pneumococc Serum—50,000 Units Type 12	2 Vials
Anti-Pneumococc Serum—50,000 Units Type 16	8 Vials
Anti-Pneumococc Serum—50,000 Units Type 17	5 Vials
Anti-Pneumococc Serum—50,000 Units Type 19	5 Vials
Anti-Pneumococc Serum—50,000 Units Type 20	24 Vials
Anti-Pneumococc Serum—50,000 Units Type 22	2 Vials
Anti-Pneumococc Serum—50,000 Units Type 23	12 Vials
Anti-Pneumococc Serum—50,000 Units Type 24	5 Vials
Anti-Venin Polyvalent Snake Bite	4 Vials
Catarrihal Vaccine	35 Vials
Catarrihal Immunagen	10 Vials
Cobra Venom	12 Vials
Coley's Vaccine 15 cc	3 Vials
Diphtheria Antitoxin 10,000 Units	20 Vials
Diphtheria Antitoxin 20,000 Units	60 Vials
Diphtheria-Tetanus Toxoid V-914	14 Vials
Furunculosis Vaccine 20 cc	20 Vials
Gas Gangrene Antitoxin, Therapeutic	40 Vials
Immune Globulin 10 cc	5 Vials
Meningococc Antitoxin	90 Vials
Mixed Vaccine Influenza 5 cc	19 Vials
Mixed Vaccine Respiratory Infection	160 Vials

Mocassin Snake Venom 10 cc	16 Vials
Pertussis Vaccine Sauer	9 Vials
Scarlet Fever Antitoxin, Therapeutic	15 Vials
Small Pox Vaccine Tubes of 5 points each	20 Vials
Staphylococcic Antitoxin 20,000 Units	105 Vials
Staphylococcic Toxoid	20 Vials
Staphlo-Strep 5 cc	5 Vials
Strept Anti (Hemolytic)	5 Vials
Streptococcic Vaccine 20 cc	6 Vials
Tetanus Antitoxin 1,500 Units	19,000 Vials
Tetanus Antitoxin 10,000 Units	125 Vials
Tetanus Antitoxin 20,000 Units	290 Vials
Tetanus Gas Gangrene, Prophylactic	1,000 Vials
Tetanus Toxoid	10 Vials
Triple Typhoid Vaccine for Fever Therapy 5 cc	129 Vials
Typhoid Mixed Vaccine 1 cc	10 Vials
Typhoid Mixed Vaccine 20 cc	27 Vials

ARSPHENAMINES PURCHASED

Mapharsen .04 Gm.	70 Amps
Mapharsen .06 Gm.	100 Amps
Mapharsen .6 Gm.	400 Amps
Neo Arsphenamine .30 Gm.	200 Amps
Neo Arsphenamine .45 Gm.	200 Amps

INSULIN PURCHASED

Insulin U-40	1,000 Vials
Insulin U-80	10 Vials
Protamine U-40	1,180 Vials
Protamine U-80	30 Vials
Crystalline U-40	150 Vials

Respectfully submitted,

A. P. LAUVE,
Chief Pharmacist.

REPORT OF CHARITY HOSPITAL GUILD

From July 1st, 1942 to June 30th, 1943

Report of Charity Hospital Guild from July 1st, 1942 to June 30th, 1943, is herewith respectfully submitted by its President.

MRS. C. WARREN GILMER.
President.

Amputation sponges	1,227,143
Masks	11,214

NAMES OF GROUPS ASSISTING IN GUILD WORK

Various groups of American Red Cross.	Trinity Evangelical Church.
Various groups of American Women's Volunteer Service.	Bethany Evangelical Church.
Various troops of Scouts.	Parker Memorial Church.
Various squads of Jr. W. A. A. C's.	American Needle Work Guild No. 16.
Various groups of High School Girls.	Grace Church.
Gumbel Girls—Gumbel Home.	Beth Israel Sisterhood.
St. Margaret's Daughters.	P. E. O.
Syrian American Club.	Thursday Needle and Thread Club.
Touro Shakespeare Home.	Sisterhood of Anshe Sfard.
F. H. A. Projects.	Rachel Sims Mission.
Seventh Day Adventists.	Sisterhood of Chevre-Tilson.
Christ Church.	St. Matthias Church.
St. Andrews Church.	Jefferson Community Presbyterian Church.
St. Anthony Church.	American Federation of Labor
Salem Evangelical Church.	(in charge of Mrs. Pooley and Mrs. Kreger).
Canal St. Presbyterian Church.	Y. W. C. A.
St. Charles Ave. Christian Church.	
Central Baptist Church.	

Also quite a few ladies work at their home. Among them is Miss Retta Lyons who was one of the original members of Charity Hospital Guild and for years held the office of Vice-President and it is due to her that I became a member of the Guild.

In 1939 Sister Stanislaus was made Honorary President for Life.

President	Mrs. C. Warren Gilmer
1st Vice-President	Mrs. J. T. Heyden
2nd Vice-President	Mrs. L. D. Barrett
3rd Vice-President	Mrs. C. J. Brauner
4th Vice-President	Mrs. Chas. Chehardy
Recording Secretary	Mrs. D. N. Marr
Treasurer	Mrs. W. S. Amoss
Publicity Secretary	Mrs. H. E. Kuhner
Corresponding Secretary	Miss Adele Reynaud

BOARD MEMBERS

Mrs. N. J. Khoury, Mrs. L. P. Lapoutge, Mrs. M. H. Jamison, Mrs. E. W. McLain, Mrs. J. Schoen.

PAST PRESIDENTS

Miss Emma Glenny	1919
Miss Emma Glenny	1920

REPORT OF THE HAPPINESS HELPERS OF CHARITY HOSPITAL

July 1, 1941 to June 30, 1943

Three Thousand patients visited—children and adults.
Fifty members of Committee attending visiting days.
Two hundred cups of ice cream distributed.
Four thousand sticks and bags of candy and candy specials distributed.
Four Birthday cakes.
Three hundred fancy cakes.
Two sacks of oranges.
Four hundred articles of clothing distributed.
Five vaudeville entertainments.
Two plants for Alter in Sisters' Chapel.
\$40.00 Cash—\$3.65 to Sisters.
\$100.00 for gift to Alter in Sisters' Chapel.
Tables and chairs in Baby Wards previously donated, refinished.
Five hundred toys distributed.
Six dozen handkerchiefs donated.
Children's play-room equipped—Holgate toys and Mother Goose pictures on walls.
Total amount expended to date by this organization \$400.00.

MRS. GEO. M. DeLUCAS, Treasurer

MRS. RAYMOND FREAS, Secretary

MRS. E. A. RAPPANIER, Chairman

OFFICERS

MRS. SARA LEE JUDIS, President

Mrs. Chester Falk, 1st. Vice-President

BRINGING THE SCHOOL TO THE HOSPITALIZED CHILD

The establishment of a class for convalescent children was begun on September 28, 1923, at the Milliken Memorial Building, Charity Hospital. At this time the Orleans Parish School Board appointed a teacher, in compliance with the request of the Medical Committee of the Board of Administrators of the hospital, to offer instruction to those children deprived of the advantages of school. During the years 1923-1929, school was operated on a half-day basis from 1 to 3 P. M. each day. Since September, 1930, regular classes have been held from Monday through Friday from 9:30 A. M. to 3:30 P. M. Professional teaching services, books and teaching equipment are furnished by the New Orleans Public School System, while building facilities and maintenance are provided by the State Charity Hospital.

On April 13, 1942, classes were begun for the negro children confined to the Charity Hospital. The Citizen's Committee for the Negro Class for Convalescents contributed toward the furnishings in the classroom. Building facilities and maintenance are provided by the State Charity Hospital while the services of a negro teacher, books, and teaching materials are provided by the New Orleans Public School System.

The class for convalescents was established with the aim of providing for the hospitalized child a program which would lessen the mental discomfort accompanying illness, enable him to maintain normal scholastic and social development, and make the period of hospitalization as profitable and as pleasant as possible.

A satisfactory adjustment of the patient to hospital routine is dependent upon healthful mental hygiene. For those youngsters who are crippled or otherwise physically disabled, the school attempts to provide the necessary atmosphere wherein the child himself is not constantly disturbed by his handicap. Serious as it may be he must learn to live with it and he is usually glad to take it and as a matter of course this attitude is mirrored in those about him.

Many children come to the hospital with strange fears of Doctors, nurses and hospitals. These fears are magnified by the unfamiliar sights and sounds of the hospital, particularly the white uniforms and strange instruments. But the school is a familiar and important part of normal child life and this routine which starts almost as soon as the young patients are put to bed in the hospital ward does much to enable them to adjust to the other less pleasant aspects of the hospital environment.

Children are introduced to the program as soon as they have received permission from their doctor. Every child is enrolled whether he is in the hospital for a few days or a period of many months. The heterogeneous group of children who are enrolled in the Class For Convalescents on the Ninth Floor of Charity Hospital range from six to twelve years of age and may be medical, surgical, paralytic, orthopedic, or cardiac patients. Last year 359 boys and 258 girls were enrolled in the Class for White Convalescent Children.

The school attempts to approximate the normal school program so that the child who is hospitalized for a long period will not lose contact with the normal home, school, and social environment. The basal text-books used in the Charity Hospital Class are identical with those used throughout the State. In this way the patient is given the opportunity to earn the same scholastic credit as his classmates at his regular school. While the goal of the special school must be modified to fit the needs of the type of child with whom it comes in contact a general objective is to give the child confidence in himself and a sympathetic understanding of other human beings.

I am frequently asked about the type of program that is offered to such a diverse group of youngsters. First of all instruction in the basic subjects is given all children according to their mental and chronological level. Then, in order to broaden the child's horizon to include many interests in spite of his handicap, nature study, children's literature, rhythms, music, games, hand-work, and art are provided.

The music program is carried on in the classroom. Rhythmic games, with each child taking part and rhythm bands are emphasized. Group singing of new and familiar songs to piano accompaniment is a favorite period for all children. Appreciation of recorded music and children's musicals on the radio are also given a place on the program.

Games and plays are taught, which the handicapped child may participate in without feeling the embarrassment of his disability. Finger plays and singing games are social activities that do not entail too much of a strain for sick children. Even the youngster with heart disease, whose physical activity is greater limited, can join in such games as "Farmer in the Dell". The child's imagination fills in the action quite satisfactorily. Quiet individual and couple games such as: checkers, dominoes, spinning games make a pleasing interval in the child's day. Through this avenue many shy, home-sick children make friends and become leaders. It also serves to teach the child the use of leisure time during long periods of convalescence.

In the classroom or ward there is a story period each day. Whenever possible the children are grouped according to age levels. Sometimes the older children read aloud to the younger children. Then for a long period in the wards books from the school's well-rounded library is a great source of pleasure.

As indicated, one of the chief objectives of the school is to enable the child to minimize his handicap and to attain wholesome social adjustment. With this in mind a large part of the daily program is social, festive, and occupational as shown by the following activities:

Art is emphasized in drawing, coloring, and painting on paper and cloth. No craft work is taught for the sake of the perfect product in itself, but rather as the child's own form of expression. Sewing (bean bags, doll clothes, marble bags, rag animals and dolls), weaving (loom and mat), spool and rag crocheting, knitting, reed and raffia work are also used as media of expression. Paper construction cutting, pasting, and clay modeling are other forms of elementary art provided. Blocks, beads, pegs, and boards, erector sets and a sand box are provided in the classroom. When the child has completed the particular work outlined for him he is free to select toys or amusements to suit his fancy. The Audio-Visual Aids Department of the Public Schools has many educational and recreational films which the children enjoy each week. Special holiday, children's birthday and special occasions are always celebrated with a party. The children plan the games, entertainment and make all the invitations and favors for such occasions.

Thus the hospital school with its enriched program of diverse activities enables the child to continue his school work while enjoying wholesome social activity.
